CLEANING & DEODORIZING TOILETS & URINALS
Always use a clean mop. Whip into foam by placing 3 to 4 ounces in a plastic pitcher, using mop and stirring in a circular motion forming a heavy foam. Do not put mop into toilet or urinal water, but use " foamed up" mop under flush ring allowing foam to slide slowly through other areas. Use this method on several fixtures: then return to original fixtures and scrub under flush ring working down to [illegible] line proceeding to [illegible]

SWIMMING POOLS & SHOWERS, ~~Wills~~ Walls--Gutters-Nickel--
For removal of soap film, Mildew, Sc Deposits. One application will usually ON FIRST CLEANING: Dip plastic or brist into this material full strength, apply spreading rapidly before liquid runs to to remain on surface 2 or 3 minutes then solution 1 part diluted with 2 parts wat area. For large areas no small sections [illegible]
