In making emulsions of PYNECO DISINFECTANT, always add the water to the disinfectant rather than vice versa. If possible, the water should be about 98 degrees Fahr.

For aid as ordinary disinfection against S. Typhosa, wash the contaminated area with a solution of 1 to 40.

URINALS AND TOILETS - Should be cleaned daily with a solution of 1/2 pt. disinfectant to 10 qts. of water. When finished, pour the solution down drains to help deodorize them.

PUBLIC PLACES - Spray freely a solution of 1-40 so as to cover all possible areas of contamination. For schools, institutions and public buildings.

OUTDOOR RECEPTACLES - Garbage pails: Wash with a 1-40 solution.

CLOSET BOWLS, TOILET BOWLS - Remove residual water from bowl prior to disinfecting. To deodorize, clean and flush the hopper each day with a solution of 1-40. This solution should also be used in the bowl.

DAIRY FARMS, CHICKEN HOUSES, SLAUGHTER HOUSES - Apply disinfectant at the rate of 1 to 40. Remove all livestock or poultry from buildings to be treated with the disinfectant. Thoroughly clean and protect or remove from the building all equipment, including feeders or waterers. Remove all litter or bedding and clean the building thoroughly. Apply disinfectant only at the reoommended rate. When feeding and watering equipment is disinfected, rinse equipment thoroughly with potable water. Ventilate the building and do not house poultry or livestock until treatment has been absorbed, set or dried. Do not make any disinfectant application when animals are in the building.

FOR CLEANING AND DEODORIZING

CLEANING - Dilute 1 part disinfectant to 100 parts of water. Wash floors and use for deodorizing sinks, refrigerators and receptacles. DEODORIZER - Add 2 ounces to regular scrubbing solution. For floors, sinks, restrooms.
