Punch Bait Hole With End of Can

Punch Bait Hole With End of Can

DIRECTIONS

Lawn Protection From Moles:

The presence of moles such as **Scalopus** sp. is usually indicated either by a network of ridges in the turf or, when burrowing deeply, by a series of conical mounds of earth pushed up from below.

Surface Ridges Runways in which moles are active may be found by collapsing the ridges at scattered points about the premises. The next day the active ridge-tunnels will be reconstructed. Carefully punch a hole in the top of active tunnels with the pointed end of the container, drop in 8 pellets of bait and carefully close the hole. Take care not to again collapse the tunnel or allow loose soil to cover the bait. Active tunnels should be baited at intervals of 15 feet.

Deep Tunnels – Remove center plug from the conical mounds with aid of a long-handled spoon and drop 8 pellets of bait into the underground tunnel. Close opening with rock or sod. Be careful to not allow loose dirt to cover bait.

Pocket Gophers Burrowing pocket gophers, Thomomys sp. and Geomys sp., throw out low fan-shaped mounds on either side of their underground tunnel. These lateral tunnels coming to the surface are on the flat side of the fan and are plugged with soil. With a long-handled spoon carefully remove the plug, insert 8 pellets of bait as far down as possible. Reclose opening, being careful not to cover bait with soil.

INGREDIENTS Active Ingredient: Strychnine Alkaloid 0.3%
Inert Ingredients 99.7%

Antidote If less than ten minutes has passed since the poison was taken, give a tablespoon of salt in a glass of warm water. Have victim lie down in a quiet darkened room and keep him warm. Call a Physician immediately.

Danger, Convulsive Poison! Do not contaminate feed and foodstuffs. Keep away from children and domestic animals. Poisonous if swallowed. Do not reuse container. Destroy when empty.

Baits should be placed in areas not accessible to children, pets, and domestic animals or in tamper-proof boxes.

Treated bait exposed on soil surface may be hazardous to birds and other wildlife. Do not contaminate water by cleaning of equipment or disposal of wastes. Dispose of excess treated pellets or wastes by burial. Apply this product only as specified on this label.
