Under no circumstances should the herbicide product or any 2,4-D or 2,4,5-T weed killer be used in the vicinity of tobacco, tomatoes, garden crops, grapes, ornamentals or other susceptible crops as severe damage may result. Extreme care must be exercised to prevent drift of this material. Do not apply on windy days. (Coarse sprays are less likely to drift.)

Do not reuse this container. Destroy by burning in safe place.

Do not use equipment used to apply 2,4-D product or any 2,4-D, or 2,4,5-T weed killer to apply insecticides, fungicides, or other material to susceptible crops.

Do not store near fertilizers, insecticides, fungicides, or foodstuffs.

Application to grassy areas may seriously damage or destroy clover. St. Augustine grass or other grasses of this area are tender.

Do not apply to heavily seeded areas.

Do not use in or near boat or water fence. Must use up to quantity, time and method of application can cause damage or injury to domestic, personal property or crop.

MIXING INSTRUCTIONS

Determine the amount of BO-RID A-4 to be used in the sprayer by multiplying the number of acres to be treated by the quantity of BO-RID A-4 recommended per acre. Add this amount of BO-RID A-4 to one-half the water required for coverage. Mix well, then add remaining water. Continue mixing until spray mixture is uniform. Best results are obtained when weeds are growing vigorously.

PERENNIAL WEEDS* IN PASTURE, RANGELANDS AND NON CROP LANDS SUCH AS FENCE ROWS, DRAINAGE DITCH BANKS, RIGHT OF WAYS

WEEDS	Amount Bo Rid A 4 Per Acre	Amount 2 4 D Acid Per Acre	TIME OF APPLICATION	REMARKS
