BROADCAST APPLICATION RATES PER ACRE FOR BLADEX® 15G HERBICIDE

(FOR BAND APPLICATION, USE PROPORTIONATELY LESS)

Soil Type Description	Percent Organic Matter in Soil*					
	Less Than 1	1	2	3	4	Over 4
	Pounds BLADEX 15G	Pounds BLADEX 15G	Pounds BLADEX 15G	Pounds BLADEX 15G	Pounds BLADEX 15G	Pounds BLADEX 15G
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]

For band application behind press wheel only use application chart for the purpose of [illegible] granules per acre needed for band treatment as follows:

Band Width in Inches / Inches Between Crop Rows	X	Broadcast Rate	=	Pounds of BLADEX 15G Herbicide needed per acre for band treatment
[illegible]		[illegible]		[illegible]

For example: 11.19 pounds per acre is the rate you would apply for the broadcast application and you want to band the [illegible] 14 inches wide in crop rows spaced 38 inches apart.

14 × 19 / 38 = 7.9 pounds of BLADEX 15G Herbicide needed per acre of crop for the 14 inch band treatment.

In the example above, the applicator should have applied 21 pounds of BLADEX 15G Herbicide by the time the applicator covered a three acre field. Calibrate the applicator frequently to ensure this delivery rate.

PRECAUTIONS IN USING

CAUTION: KEEP OUT OF REACH OF CHILDREN. Harmful if swallowed. Avoid [illegible] contact with the skin or eyes. Wash with plenty of soap and water after handling. Remove contaminated clothing immediately and launder before reuse. Do not inhale dust. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate feed or food. DISPOSAL: Dispose of empty containers in a sanitary landfill or by burning in an approved incinerator. Do not reuse empty container.
