LCK 70 Supreme is a highly refined emulsifiable oil spray es rally formulated for early season use on deciduous fruit trees base oil in this quality product lies entirely within the designa for 70 second superior type spray oils. The high degree of nement and distillation has removed the less desirable fracs and impurities leaving only that portion which provides erior mite and scale killing power combined with maximum e safety. Special emulsifiers allow an improved and unique ulsification system that affords optimum coverage of deposits

MIXING DIRECTIONS

Fill spray tank with water. Add the dry spray material. VOLCK 70 Supreme should be added when tank is about half full and when there is sufficient agitation of the spray to insure proper emulsification. Check this product for proper emulsification by adding a small quantity of it with water in a small container before filling the spray tank. Proper emulsification is indicated when a uniform milk white spray mixture results when shaking. If the spray mixture is not milk white, shake the remaining product
