April 25, 2002

MEMORANDUM

SUBJECT: Data Reporting for Fine Particles ($PM_{2.5}$)

FROM: J. David Mobley, Acting Director (SIGNED)
Emissions, Monitoring, and Analysis Division (C304-02)

TO: Addressees

This memorandum transmits the current data completeness statistics for the fine particulate ($PM_{2.5}$) air quality monitoring program as reported to the Air Quality System through April 15, 2002.

The mainframe Aerometric Information Retrieval System transitioned to the re-engineered data management system, Air Quality System (AQS), in January. I recognize that this transition to the AQS has required more of the State, local, and tribal agency resources than normally expected; therefore, I include information only for the $PM_{2.5}$ data reporting through the fourth quarter of 2001. Submission of the $PM_{2.5}$ is a priority for the Agency as we begin to assess the first three years of data. I will resume providing a full data completeness report for each of the criteria pollutants in July 2002.

$PM_{2.5}$ Data Completeness for January through December, 2001

Nationally, there were 1101 $PM_{2.5}$ Federal Reference Method (FRM) sites that operated in all four quarters of 2001 (see Figure 1). Sixty-three percent of these (699 sites) have reported 75 percent or more of the expected data points in each of these quarters. While 78 percent (864 sites) have 11 or more samples in each of these quarters. Overall, the data capture rate averaged 80% for the year based on information submitted as of 04/15/02. Please refer to Map 1 and Table 1 for an illustration of where these sites are located and their relative data completeness.

Most of the air quality monitoring agencies have reported their $PM_{2.5}$ data through the fourth quarter of 2001; however, a few have not entered any data for any quarter of 2001. You can identify more specific statistics about how agencies within your Region are performing by reviewing information

in Map 1 as well as Tables 1 and 2. Table 1 summarizes 2001 FRM data capture by Region and State, and Table 2 shows information for individual monitors. The remaining few areas that continue to have data reporting problems merit more of your attention. Please feel free to contact me if our office can be of any assistance for these situations.

We are also beginning our data reviews and analyses of the first three years of $PM_{2.5}$ data. Please review the information in Table 2 to ensure it is an accurate reflection of data submitted. In particular, the FRM sampling frequencies (SF) factor into our understanding of data completeness. Although there is an AQS sampling frequency field, its content for some $PM_{2.5}$ monitors is blank or erroneous. I need your help to determine the appropriate information for your Region. The sampling frequencies (by quarter) are identified for each FRM monitor in Table 2. Please verify the frequencies for the sites in your Region and forward any corrections to Mark Schmidt (schmidt.mark@epa.gov) by May 31, 2002. Also, please encourage your States to update the AQS field accordingly.

Please continue to work with your State, local, and tribal air quality monitoring agencies to encourage them to report their data into the re-engineered AQS so that complete and quality assured data can be "certified" by July 1, 2002. I appreciate your attention toward air quality monitoring and data reporting.

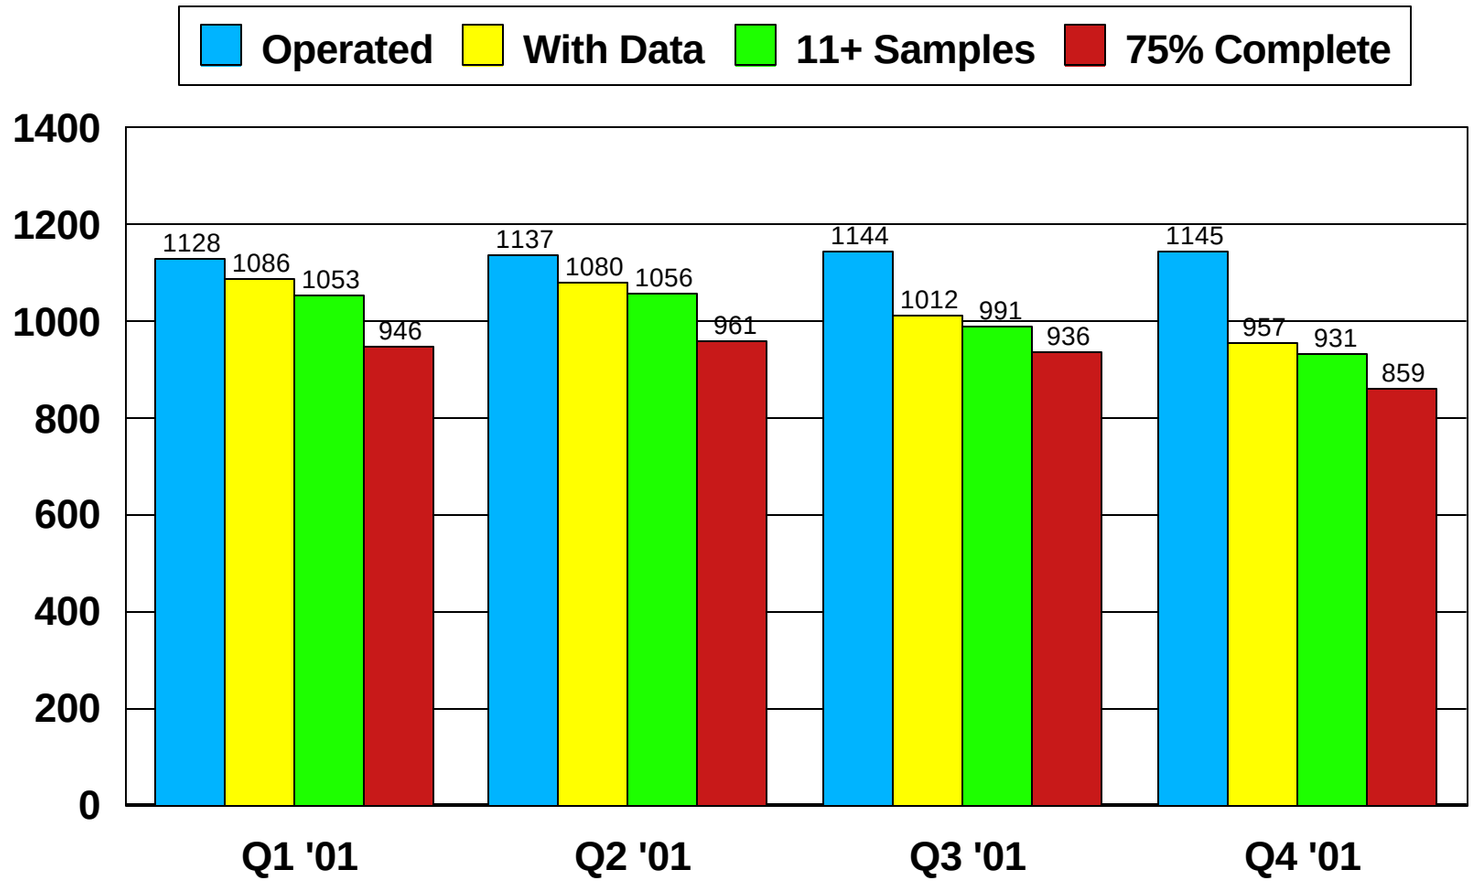
Figure 1: Data Capture Rates at $PM_{2.5}$ FRM Sites, 2001

By Quarter

AQS 4/15/02

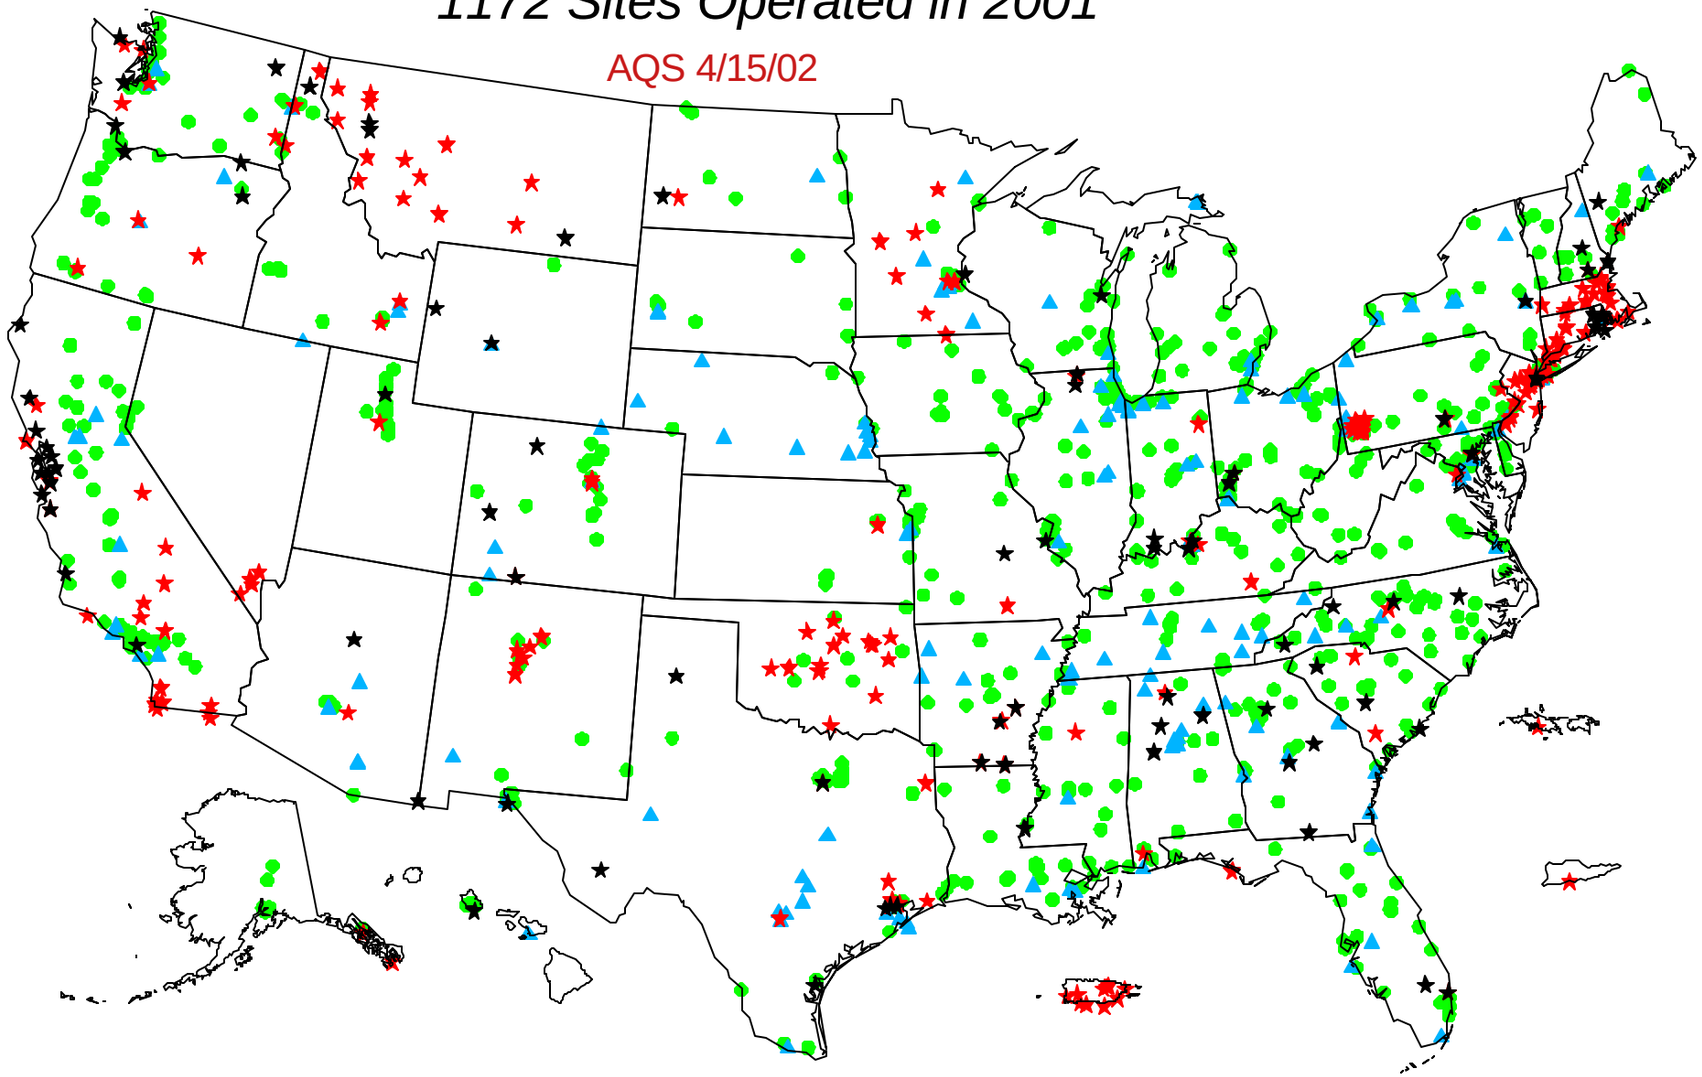


- 1172 sites operated during the year
- 1101 sites operated all 4 quarters
- 699 sites (63% of 1101) have 4 complete quarters ($\geq$ 75%)
- 864 sites (78% of 1101) have 11+ samples in all 4 quarters

Map 1: Data Capture Rates at $PM_{2.5}$ FRM Sites in 2001

1172 Sites Operated in 2001

AQS 4/15/02



- Sites with 4 complete (75%+) quarters [699]
- Sites with 11+ samples in each quarter but less than 75% [165]
- Incomplete sites missing all of 4th Quarter [215]
- Other incomplete sites [93]

'Avg. Capture' for a quarter is the composite average of the quarterly site data capture rates (number of scheduled samples reported / number of scheduled samples). The quarterly rates are averaged at each site to obtain an
* annual site capture rate. The composite average of these annual site rates is shown in the last 'Avg. Capture' column.
