ACCEPTED

JAN 19 1979

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 3546-27

RESIDUAL ACTION

One spraying of the Shoo-fly HOMBB® Jet-Bomb lasts for week. When used as directed this bomb leaves an invisible film that continues to kill hornets, wasps, earwigs, bees, flies, ants, mosquitoes, roaches and assists the prevention of maggots in garbage pails.

DIRECTIONS

TO OPERATE: Remove protective cap. Point nozzle toward area to be sprayed and press valve lightly for a mist spray, and press down all the way for a long-distance stream spray. The special nozzle will project a stream 25 feet. Spray surface to point of run-off. Treated surfaces have a residual killing action for two to four weeks against insects. If reinfestations occur, due to migrations — or removal of the insecticidal film by water or wear, repeat treatment. When near end of can use short bursts.

FOR LONG-RANGE DISTANCE BOMBING (up to 25 feet)

HORNETS, WASPS, BEES, YELLOW JACKETS: Here is a good method to control these insects when they become a menace. Look for the holes whereby they enter, or surfaces where they congregate — and spray thoroughly. Be sure to depress nozzle all the way down, and move back as far as possible. Those insects hit directly by the spray will fall to the ground very shortly. Since the spray is residual, insects coming in contact with the sprayed surfaces, will die soon after. Usually the treated areas are free of hornets 24 hours after spraying.
ROACHES, ANTS, WATERBUGS, SILVERFISH, SPIDERS, CRICKETS: Spray heavily into all cracks, around baseboards, and other places where these insects hide. Also spray until wet, surfaces behind and beneath cabinets, refrigerators, sinks, stoves, etc. Spray other localized areas infested with these pests. Repeat treatment as required.
EARWIGS: Use regular mist spray. Hold container 12 to 18" from surface to be sprayed. Spray to the point of run-off, doorsills, windowsills, lawn furniture, clothes posts, junction between foundation and house, and other areas where earwigs tend to congregate.
SPIDERS: Spray spiders and their immediate vicinity thoroughly.
MAGGOTS: To aid to keeping garbage cans free of flies and maggots, spray inside and outside frequently.
FLIES, MOSQUITOES: Apply only as a residual spray to screens and surfaces where insects alight.

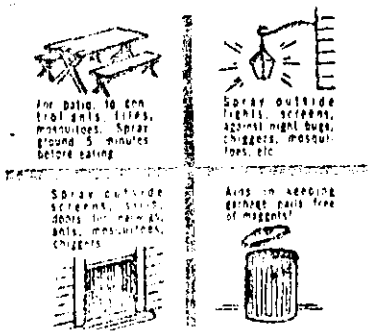
EXCLUSIVE CLEANER

2-way action!

- LONG RANGE JET BOMBING
- REGULAR MIST SPRAY



INGREDIENTS

ACTIVE INGREDIENTS: 25%

0.503%	O,O Diethyl O (2 isopropyl-4 methyl-6 pyrimidinyl) phosphorothioate
0.075%	pyrethrins
0.762%	technical piperonyl butoxide (equivalent to 0.210% (butyl carbityl (6-propyl piperonyl) ether and 0.052% other related compounds
74.213%	petroleum distillate

INERT INGREDIENTS: 75%

PHYSICAL OR CHEMICAL HAZARDS

Flammable. Contents under pressure. Keep away from heat, sparks, and open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.
Do not use as a space spray. When using as a mist spray, hold container 12 to 18" from surface.
Avoid inhalation of spray, or contact with skin, eyes, or clothes. Store away from children. Avoid use on pets, fish, birds, or vegetation. May be absorbed through skin. In case of contact, wash immediately with soap and water. Avoid contamination of food and foodstuffs. Harmful if swallowed.
