DISA

Pa[illegible]

Active ingredients . . . . . [illegible]
Potassium dimethyldithiocarbamate [illegible]
Tetrasodium ethylenediaminetetraacetate [illegible]
Inert ingredients . . . . . [illegible]

Weight per gallon . . . . . [illegible]
Weight of active ingredient per gallon . . . . . [illegible]

APPLICATIONS

DISA is used for the control of both sulfate-reducing bacteria and mineral scale in the waters utilized in the secondary recovery of petroleum, including produced salt water, sea water, salt water from wells, commingled waters, water retained in open ponds and water going to disposal wells. For control of sulfate-reducers, DISA is employed at 1.5 to 4.0 fluid ounces per thousand gallons of water treated. Such treatment rates are usually also sufficient for good scale control, but under severe scaling conditions it may be necessary to use 3.0 to 5.0 fluid ounces per thousand gallons treated. Technical assistance in the application of DISA to particular secondary recovery systems is available upon request when a description of the problem is provided.

CAUTION

KEEP OUT OF REACH OF CHILDREN

Avoid contact with skin, eyes, and clothing. Harmful if swallowed. Avoid contamination of feed.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes.

If swallowed, give patient doses of powdered charcoal immediately or all he can swallow of raw egg whites, milk, gruel, or flour and water. Induce vomiting with salt, soap, or mustard in warm water. Call a physician immediately.

This product is toxic to fish. Treated effluent should be [illegible] before it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

Do not reuse empty drum. Return to drum reconditioner or destroy it by perforating or crushing and burying in a safe place.
