READ ENTIRE LABEL BEFORE USING THIS PRODUCT

CG-260 is a specially designed mixture of MSMA liquid plus surfactant for Selective Post-emergent Weed Control particularly for grassy type weeds. CG-260 contains a Phytotoxic ingredient that acts on weed contact, but is quickly inactivated on contact with soil. It is unnecessary to add any other surfactants. The most effective control is obtained on young actively growing weeds at temperatures above 70°F.

MIXING INSTRUCTIONS: CG-260 herbicide must be thoroughly mixed with water. Fill the spray equipment reservoir about half full with water and add the required amount of herbicide with agitation. Finish filling the reservoir with water and apply. After use clean the equipment thoroughly by flushing with water. Do not store spray solution in tank for a prolonged period.

DIRECTIONS FOR USE

[illegible] AND ORNAMENTAL TURF: [illegible] lawns, [illegible] May be [illegible] CG-260 [illegible] gallons of water and apply [illegible] 100 square feet [illegible] to wet [illegible] plants [illegible] may be needed for good control [illegible] water [illegible]

[illegible]

The above [illegible] johnsongrass, nutsedge, [illegible] dallisgrass, [illegible] turfvine, bahiagrass, chickweed, wood sorrel and [illegible] with little or no injury to good lawn grasses.

On new lawns, do not treat until [illegible] after 3 mowings. [illegible] temporarily discolored. Zoysia, bluegrass and be made [illegible] Do not use on St. Augustine or Centipede.
