Active Ingredient:
Sodium dichloro-s-triazinetrione 95%
Inert Ingredients 5%
Available Chlorine 62%

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

1. FOR CONTROL OF BACTERIA AND ALGAE (OUTDOORS) IN SPAS OPERATED CONTINUOUSLY: Before bathing, test water pH, chlorine residual and alkalinity using a suitable test kit. Adjust chlorine residual to 3.0 ppm. Maintain pH of water between 7.2-7.8 and total alkalinity between 125 and 175 ppm with the addition of Spa-care pH Stabilizer.

2. This product does not affect pH or alkalinity of water. One tablet (½ oz.) per 1000 gal. of water gives 3 ppm of chlorine. To use apply sufficient tablets to the feeder to maintain the chlorine level at 1 to 3 ppm. Bathing can start when the chlorine level is between 1 and 3 ppm.

3. Test often and keep chlorine residual above 1.0 ppm by adjusting output from feeder to bather load.

4. Weekly, superchlorinate water to 5 or 6 ppm using E-Z TABS as recommended on the label directions. Usually 1 E-Z TAB per 500 gal. of water gives 6 ppm chlorine. Draining and cleaning of spa is recommended whenever the water becomes difficult to manage. Avoid use of products such as body lotion that consume chlorine.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENT: Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

PRACTICAL TREATMENT (FIRST AID): If swallowed feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately. If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in Eyes: Flush with cold water for at least 15 minutes. Get medical attention.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool dry, well ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in a trash collection or dispose in approved landfill area, or bury in a safe place.
