
ACTIVE INGREDIENTS:	
Ferbam (Ferric Dimethyl Dithiocarbamate)	**11.4%**
Carbaryl (1-naphthyl N-methylcarbamate)	**5.0%**
INERT INGREDIENTS:	**83.6%**
TOTAL	**100.0%**

***Trademark of Union Carbide Corporation for the active ingredient 1-naphthyl N methylcarbamate.**

SUGGESTIONS FOR USE

IT IS VERY IMPORTANT THAT IT BE UNDERSTOOD THAT THIS FERMATE DUST MUST BE APPLIED BEFORE DISEASE INFECTION OCCURS IN THE PLANTS.

FOR TOBACCO PLANT BEDS: To control Tobacco Blue Mold and Tobacco Flea Beetles in plant beds, apply material with a suitable dust gun without further mixing. Treatment of the plants should begin when the leaves are the size of a dime. Dust twice weekly until transplanting time making sure that all parts of the bed receive an even [illegible] through dusting. If rain occurs between regularly scheduled applications, the treatment should be repeated as soon after the rain as practicable.

[illegible] COST REQUIRED TO COVER PLANTS
[illegible] 4th application—1[illegible] per 100 square yards
[illegible] applications [illegible] per 100 square yards
[illegible] per 100 square yards
