"FOGG-R"

Insecticide

A concentrated spray for the control of flies, moths, roaches, ants, mosquitos, gnats, and exposed stages of silverfish by fogging.

For best results, close doors and windows while fogging and keep closed at least ten minutes or longer. Do not remain in treated areas and ventilate the area after treatment is completed. Apply at rate of 0.5 fluid ounces per 1000 cubic feet for control of the listed flying insects and at the rate of 3 fluid ounces per 1000 cubic feet for silverfish control.

This material should be used in fogging equipment only. Completely envelope area to be treated in accordance with type of equipment used. For both indoor and outdoor use. Avoid prolonged inhalation. Remove birds and fish bowls. Cover exposed foods. Can be used around food products if they are protected during fogging operation. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product in a spray gun in the same room, spray only when plant is not in operation.

ACTIVE INGREDIENTS

Lindane	0.062%
*Piperonyl Butoxide (technical)	0.5[illegible]%
Petroleum Distillate	[illegible]
	[illegible]

* [illegible] (isopropylcarbityl) (6-propyl-piperonyl) [illegible] of [illegible] compounds.
