FOR SPARKLING POOLS

nu-clo

DUROCHLOR

SUPER CHLORINATOR

• FOR LONG LASTING SUPER CHLORINATION OF POOLS •

• RAPID CONTROL OF ALGAE •

• PROVIDES INSTANT CHLORINATION FOR POOLS AT BEGINNING OF SEASON •

• COMPLETELY SOLUBLE - WILL NOT CLOUD WATER •

Active Ingredient:	
Sodium dichloro s-triazinetrione	57
Inert Ingredient	43
Provides 35% Available Chlorine	

KEEP OUT OF REACH OF CHILDREN

DANGER

SEE FIRST AID STATEMENT AND OTHER PRECAUTIONS ON SIDE PANELS BEFORE OPENING CONTAINER

NET WEIGHT 10 LBS.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Avoiding to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact

PHYSICAL AND CHEMICAL HAZARDS: **STRONG OXIDIZING AGENT:** Mix only with water. Use clean dry utensils. Do not add this product to any oxidizing agent containing compounds or any other product. Such use may cause a violent reaction leading to a fire or explosion. Contamination with impurities, organic matter, or other chemicals may start a chemical reaction with generation of heat, fire and of hazardous gases, and possible generation of fire and explosion.

PRACTICAL TREATMENT: (First Aid): If swallowed, feed bread soaked in milk followed by olive oil. Call a physician immediately. If on skin: Wash with excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

SPECIAL PRECAUTIONS

PLEASE READ BEFORE OPENING CONTAINER

PREVENTION OF PHYSICAL INJURY:

1. This product emits a powerful chlorine gas. Do not open container indoors. Avoid inhaling fumes when opening to avoid breathing fumes.
2. This product is dangerous when not used properly.

MISUSE MAY RESULT IN SERIOUS PERSONAL INJURY REQUIRING HOSPITALIZATION RELATED COMPLICATIONS MAY LEAD TO DEATH

Do not mix with any other chemicals.

Mixing with other chemicals may cause a violent and extremely dangerous chemical reaction.

Do not add water to this product.

Do not add this product to water in a pool.

Do not take advice from others.

Do not experiment.

Follow label instructions exactly.

PREVENTION OF PROPERTY DAMAGE: Contact between this product in undissolved state and most fabrics, painted surfaces or other property in or around the pool will result in permanent bleaching of the color.

STORAGE AND DISPOSAL: Keep product only in tightly closed containers when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition isolate container in open area if possible, and flood with large amounts of water. Do not reuse empty container. Rinse empty containers thoroughly in an approved landfill area.

Place in trash collection or dispose in approved landfill area.

SUPERCHLORINATION

DUROCHLOR provides an easy efficient method for superchlorination. When starting up a pool at the beginning of the pool season, proper application of this product will provide a high chlorine residual in minutes without the cloudiness associated with other commonly used chemicals.

ALGAE CONTROL

DUROCHLOR is designed for the quick and easy control of green slime due to algae growth. Within minutes after proper application, algae will begin to be destroyed. DUROCHLOR will dissolve quickly without leaving a residue. Dead algae will drop to the bottom of the pool while the unsightly green color of the water disappears.

DIRECTIONS

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

SUPERCHLORINATION: When starting a new pool, superchlorinate to satisfy chlorine demand and to establish an available chlorine residual of 1.0-1.5 p.p.m. (parts per million). Add 4 ounces of DUROCHLOR per 1,000 gallons of water to provide 5.8 p.p.m. available chlorine. Use the appropriate application guideline below. The following morning (if not done previously), stabilize the water by adding Conditioner and Stabilizer (Cyanuric Acid) according to the directions on the label. Test with a reliable test kit. Bathers should not be allowed to enter the pool until the chlorine residual has dropped to 3 p.p.m. or less.

SHOCK TREATMENT: Dose at the rate of 4 ounces per 1,000 gallons of water, using the appropriate application guideline below. In some cases when the extent of organics present in the pool does not allow the water to respond to the initial dose, a second treatment may be necessary. Allow filter to run continuously being careful to empty skimmer basket in front of pump if suction is impeded. Also, there may be a tendency for the filter to clog due to the accumulation of dead algae. Backwash filter if this occurs. Repeat dosage on the second day if necessary. If there is no improvement on the third day, contact your dealer or the manufacturer of this product for further advice. Bathers should not be allowed to enter the pool until the chlorine residual has dropped to 3 p.p.m. or less.

DAILY CHLORINATION: Adjust pH to 7.2-7.6. DUROCHLOR should be added daily or as needed at the rate of 1/4-1 ounce per 1,000 gallons to maintain a chlorine residual of 1.0 to 1.5 p.p.m. at all times, as determined by a reliable test kit.

APPLICATION MAY BE MADE USING ONE OF THE FOLLOWING METHODS:

SKIMMER: Use this method to avoid bleaching your liner or paint. Empty skimmer of all chemicals and/or debris. Make sure that filter is on and that water is properly recirculating through skimmer. Remove any chemicals that may be in an inline automatic chemical dispensing device. Pour DUROCHLOR slowly into skimmer, making sure that the material is drawn into the system at the same rate. Do not allow this material to accumulate as gases generated may cause an explosion.

DOSE DIRECTLY INTO POOL:

Broadcast dosage across surface of water. To prevent liner damage, use Skimmer method above.

Note on pools treated for algae: If this product is used to shock or superchlorinate an algae infested pool, after treatment it is important to brush the walls and floor to expose algae that may be in cracks or wrinkles that might protect algae from high chlorine residuals. Such protected algae will begin to reproduce again when high chlorine residual falls.
