This spray may be used as a residual film to control flies, mosquitoes, gnats, wasps and certain other flying insects.

Direct a fine spray into all infested sections of the room and saturate the atmosphere. Apply at the rate of 1 to 2 ounces per 20 cubic feet.

Dry spray is very convenient for control of ants, roaches, silverfish and spiders.

Spray all crack and crevice harbors, moldings, furniture, cabinets, shelves, sinks, pipes, walls, cracks and dark corners until thoroughly soaked. Treat floors, sills and window frames where insects rest or hatch. [illegible] contact these [illegible] to spray.
