MCPP +2,4-D Amine (1 Plus 1)

Read entire label before using this product

General Information

MCPP + 2,4-D Amine (1 Plus 1), a selective [illegible] in lawn grasses, is a post [illegible] herbicide especially formulated for use on turfgrass for selective control of many broadleaf weeds commonly growing in lawns [illegible] tolerable grasses. This [illegible] may be used on all types of turf [illegible] Merion, Kentucky bluegrass, bermudagrass, fescues and rye grasses. This product has been used successfully on bentgrass, however, it should not be used [illegible] tests have shown it to be non-[illegible] under the particular conditions of [illegible] broadleaf weeds, it is better to [illegible] another selective weed killer for fine lawn grasses.

Note MCPP [illegible] slowly than 2,4-D so that [illegible] weeds will be controlled before other [illegible] 3 to 4 weeks for complete weed killing [illegible]

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Preparation of the Spray: This product must be mixed with water prior to use. For best results use 2 to 4 gallons of water per 1,000 sq. ft. for smaller areas, 20 to 40 gallons of water per acre for larger areas. Apply by means of a sprayer to give uniform coverage. Repeat applications may be necessary especially with heavy infestations of the less susceptible weeds indicated with an asterisk in above list.

Either before or after application, it is wise to properly fertilize the lawn so as to encourage the lawn to heal as rapidly as possible, filling in the bare areas where the weeds have died away. Once the weeds have been removed, the bare areas should be reseeded. Bare areas may be reseeded 3 to 4 weeks after application.

Time of Application: Apply in spring or fall when weeds are actively growing. Knotweed is controlled more easily in spring or early summer when weeds are young. **Do not** apply when turf is suffering from drought conditions or during very hot weather or damage to grass may result. **Do not** mow for several days before or after application. Withhold sprinkling for 24 hours after application. **Do not** apply during periods of heavy rainfall. **Do not** use on newly seeded areas. **Do not** use if you want clover in your turf. In some areas bent, carpet, buffalo and St. Augustine grasses may be injured therefore, **do not** use on turf where these grasses predominate.
