6 LBS PER GALLON

Keep Out of Reach of Children

## WARNING

FIRST-AID TREATMENT

**INTERNAL:** If toxaphene is swallowed, do not induce vomiting. Physician's Note: never give anything by mouth to an unconscious person. Call a physician in all cases of suspected poisoning.

**EXTERNAL:** Remove contaminated clothing and wash skin thoroughly with soap and water. If in eyes, flush with clean water for at least 15 minutes.

**PHYSICIAN'S NOTE:** If swallowed, use gastric lavage. Avoid aspiration. Toxaphene produces central nervous system excitation. Patient responds to barbiturate acid formation. Prevent or control convulsions with barbiturates, preferably administered intravenously. If the barbiturate mentioned above fails convulsions start, sodium pentobarbital [illegible]. The dose of [illegible] Since Toxaphene has a fairly long duration of action, a long-acting barbiturate such as phenobarbital may be used after initial control of convulsions. Refer to "Clinical Handbook on Economic Poisons," which was prepared by the U.S. Department of Health, Education and Welfare, Publich health Service, Communicable Disease Center, Atlanta, Ga.
