RETURN TO 1998 ROD AR INDEX

4/5/95 CDF-7 Mtg. w/ City

4.1.110

1/2
DTD
NBH

SDMS DocID 46262

- HDC had original idea for CDF-7 (?!) Now in support of concept

- tenets, utilities, future usage are main issues

*- City has ~~now~~ reacquired adjacent land N → willing to add to project
  - Acushnet River Shipyard (Donald Green) ① ← most-impacted

- slab facility could exist afterwards, but utilities still a problem

- ② Chambers
  ~~③ N.B. Welding~~
  Canadian ④ Marine Hydraulics ← 2nd-most impacted
  ⑤ Packer Marine

6 ~ 7 tenets, 3 are water dependent

- 120,000 yd³ to S fund portion, tied-in to existing elev.
  - 40,000 yd³ S of facility for City

Superfund Records Center
SITE: New Bedford
BREAK: 04.01
OTHER: 46262

*- Revere Copper also impacted to North

** Mo's idea: extend E boundary out seaward, and relocate channel to limit tenet impacts

MM: Acushnet River is sublease to Herman Melville
- easier to relocate; deal w/ one tenet only
~~- non-wat~~

2/2
DDD

- verify new volume if pushed E border out
- 2 barges (300') would be left or removed depending on ease of disposal

* MM invited us on boat tour
  - call to schedule, and to discuss part. in forum
