RETURN TO SER AR INDEX

Ann Williams (EPA) { Jerry, Cindy, Ann

8/14/10 Call w/ Ken Kimmel (MADEP)

Appx 3 - in draft form - He said it would be brief response from TT
There have been discussions bet. Siemens + Tetratech
Siemens ~~manufact~~ assembling onshore
another co. will install at offshore site
The additional information is coming from Siemens

Fairhaven
We can push harder on "under" agreement
if can nail down - cd go with that
if can't nail down - we probably ~~may~~ include the other arguments
Maybe Cape Wind cd send letter explaining they much better understand what's needed

Focus on 20 acres + good explanation why it's the bare minimum along w/ other criteria - either TT or Siemens

Clarify that its primarily offshore wind support w/ subordinate other uses

Cindy - draft TSCA determination will need to be done by time of public comment period.
Schedule call w/ Kim TSCA + Apex

Cindy raises Qs about how the remedy is referred to. Ken asks Cindy to provide some suggestions for enhancement language

Submission of remaining pieces ~ Aug 15
will
