3 11/13/12 Call w/ Chet, Carl, Cindy Ann, Gary

width issue

Gary - ~~early this year~~ coming out of draft det., their understanding that they'd be given the 225' width. Surprising in response to NMFS that we backed off of that.

Expectation by mayor + in the admin that there'd be approval to build to accomm. international clientele. They're doing that much mitigation at sig. cost.

Committing to extra mitigation was for the exchange of getting approval up front.

They're wanting to sell this as an international port & ~~a~~ expecting 225 + if we only approve 175 it'll make it difficult for them to ~~sell it~~ market it as an international port.

This is a <u>political</u> issue + he plans to elevate.

The issue Gary is advocating for is limited to the channel width.

the 50' ~~channel~~ expansion in fed channel wd be ~ 3000 cu. yds. extra.

Cindy asks whether he's raised the issue to anyone to get their reaction + he says no.
