DATA REVIEW FOR SKIN IRRITATION TESTING (§81-5)

Reviewer: L. Markarian

Report Date:3/12/93

Report No.: E3334

Product Manager: 18 MRID No.: 427125-02

Testing Laboratory: Cosmopolitan Safety

Author(s):Geoffrey Robbins

Species: Rabbit, New Zealand White

Age:young adult Sex:J M & 3 F Weight:2.0 - 2.2 K

Dosage: 0.5 g

Test Material: BMP 123 (2X WP) Lot 4922

Quality Assurance (40 CFR §160.12):Included

Summary:

- 1. The Primary Irritation Index = 0.6
- Toxicity Category: IV
- 3. Classification: Core minimum

Procedure (Deviations From §81-5):

Each aliquot of test material was mixed with 0.7 ml of water to make it into a paste before application. This paste was applied to the shaved skin of the rabbits. The site was covered with 6 cm² gauze pad, and the trunks were wrapped in perforated plastic sheeting. At 4 hrs the patches were removed and the sites wiped with moist paper towels. Evaluations were at 1, 24, 48, 72 hrs and on day 4 according to modified Draize scale.

Results:

No score greater than grade 1 erythema or edema was observed at any site, at any interval. All irritation subsided by day 4.
