

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

MEMORANDUM

JAN 13 1992
JAN 13 1992

→ Brozner

SUBJECT: Suspension of Aceto's Chlorpropham Technical Product.

OFFICE OF
PESTICIDES AND TOXIC
SUBSTANCES

FROM: Lois A. Rossi, Branch Chief
Special Review and Reregistration Division (H7508W)
Office of Pesticide Programs

Lois Rossi

TO: Bob Zisa
Laboratory Data Integrity Assurance Division
Office of Compliance Monitoring (EN-342)

Please suspend EPA Reg. No. 2749-102, Aceto Chlorpropham Technical, for failure to submit required product chemistry data as outlined in the enclosed letter. On September 26, 1991 the Agency notified Aceto Chemical Company through its Agent (John Wise), of existing product chemistry data gaps and required that the data be submitted within 30 days of receipt. Prior to mailing the September 26 letter, Mr. Wise had a meeting with the Review Manager of Chlorpropham on July 29, 1991 and stated that Aceto had sent in their product chemistry in 1989, however he had no MRID's to support the statement. Mr. Wise was then sent the letter of September 26, 1991.

Since October 30 (the due date for the data), the Review Manager contacted Mr. Wise several times to inquire about the data. Mr. Wise's answer was that it had been sent, but must have gotten lost. Mr. Wise was then asked to send the data directly to the Review Manager (Venus Eagle) at Crystal Station. Again No data were received. On December 13, 1991, Mr. Wise was sent another letter which again stated that failure to submit the product chemistry data would result in the issuance of a Notice of Intent to Suspend, affecting Aceto's registration of Chlorpropham. Ten days were provided to submit the data - it was due to the Agency on 01-09-92. To date no data have been submitted and Aceto is not in compliance. Please initiate suspension proceedings.

Chemical: Chlorpropham
