MEMORANDUM

SUBJECT: Copper Ammonium Carbonate (Group II Copper Compounds) Reregistration (Chemical No. 022703; Case No. 0649). Chemical Specialties Inc., (CSI) Response to the Product Chemistry Data Requirements Regarding Physical and Chemical Characteristics (63-2 to 63-13). (CBRS # 10749; MRID # 424880-01; DP BARCODE: D183713).

TO: L. Rossi, Chief/W. Waldrop, PM 71
Reregistration Branch
Special Review and Reregistration Division (H7508W)

Chemical Specialties Inc., (CSI) submitted product chemistry data regarding the physical and chemical characteristics (Guideline References 63-2 to 63-13) of a liquid test substance.

A Copper Group II Registration Standard has been issued and the Product Chemistry Chapter was dated 6/30/86. The Guidance Document for the Reregistration Standard is dated April, 1987. This submission is in response to product chemistry data requirements in the Guidance Document.

PHYSICAL AND CHEMICAL CHARACTERISTICS

The submitted (MRID No. 424880-01) physical and chemical characteristics data were apparently generated using an 8% liquid product as test substance.

These data do not satisfy the generic requirements pertaining

Recycled/Recyclable
Printed with Soy/Canola Ink on paper that
contains at least 50% recycled fiber

1/2

0068

to the physical/chemical characteristics (Guideline No. 63-2 to 63-13) because the test substance used to conduct these studies was of unspecified source and purity. The test substance must be free of all intentionally-added inerts and any solvent, diluent, etc. used during synthesis.

Product chemistry data to support MP (63-series only) or end-use product registration that reflects use of said EP or MP as test substance are to be forwarded to RD/RSB for review.
