ENVIRONMENTAL CHEMISTRY REVIEW FOR Methoxychlor  
PP # 4F 1467  
Chemical Formulators Inc.

I. INTRODUCTION

1. Cottonseed
2. See environmental reviews of 1/19/68, 12/30/68.
3. TMP<sup>(6)</sup> active ingredients Toxophene, Methoxychlor, Methyl parathion, Xylene.

II. DIRECTIONS FOR USE

Maybe applied by ground or aircraft. For ground dilute in sufficient water to give coverage, for aerial dilute in 3-4 gal water per acre.

Early season control .47-.55 lb methoxychlor per acre. Make two or three applications starting at the two leaf stage.

Late season control: .83-1.25 lb ai/acre. repeat at 5 day intervals as insect counts indicate they are necessary.

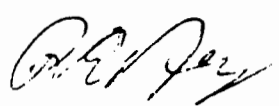

Do not apply within 5 days of hand picking. Do not graze dairy or slaughter animals in treated fields.

III. CONCLUSIONS

Registered for crops in same crop group.

IV. RECOMMENDATIONS
