**ACTION REQUESTED:** The Registration Division (RD) requested Health Effects Division (HED) to perform a review of a preliminary developmental neurotoxicity study (MRID 46501102) for fenamidone in support of re-evaluation of the database uncertainty factor that was previously applied.

**RESPONSE:** Health Effects Division (HED) does not perform reviews of preliminary study reports. Until the registrant submits and EPA reviews the final study report for the developmental neurotoxicity study, the 10X database uncertainty factor will remain. Since the study is preliminary, unaudited data, HED has not prepared a complete data evaluation record (DER).
