## BACKGROUND:

The Sun Refining and Marketing Co. submitted documents stated to contain acute toxicity evaluations of their fungicide product, SUNSPRAY-9 MRID NO. 402812-01, reported to contain acute oral acute dermal, eye irritation, dermal irritation, and dermal sensitization studies.

MRID NO. 402812-02 was reported to contain an acute dermal study.

## RECOMMENDATION:

MRID NO. 402708-06 is entitled "Eye Irritation in rabbits (SUNSPRAY 6N)."

MRID NO. 402708-07 is entitled "Primary dermal irritation in albino rabbits (SUNSPRAY 6N)."

## RECOMMENDATION:

BEST AVAILABLE COPY

1) MRID NOS. 402812-01, and 402812-02; reported to contain supporting acute toxicity studies:

a. A number of hydrocarbons were tested - it was not clear which chemical represented SUNSPRAY 9N.

b. Summary test results only were presented for the acute oral, acute dermal, eye irritation, dermal irritation, and dermal sensitization studies (402812-402812-02).

P.M. Note: The Agency will not accept summary data only; positive identification of all materials tested, and complete experiments, including all raw data must be submitted.

2) MRID NO. 402708-06 "Eye irritation in Rabbits (SUNSPRAY 6N)";

MRID NO. 402708-07 "Primary dermal irritation in Albino rabbits (SUNSPRAY 6N)."

NOTE TO PM: Both the eye and dermal irritation studies are acceptable to RSB/PRS tentatively; providing the registrant can satisfactorily clarify and establish that the materials tested are identical to SUNSPRAY 9N.

Specifically, identify: SUNSPRAY 6N, and "test article # 8601507".

**BEST AVAILABLE COPY**

3) An acute oral, dermal, inhalation toxicity and dermal sensitization studies must be submitted. If the Registrant can prove that the eye and dermal irritation studies discussed under 2) above employed SUNSPRAY 9, additional eye and dermal irritation studies will not be required.

LABELING: NOTE: The following Precautionary labeling statements may require revision, upon submission of the requested acute toxicity studies:

- 1) The CAUTION label signal word is appropriate.
- 2) Under Precautionary Statements, following "Avoid breathing of spray mists or vapors," add "Avoid contact with skin or clothing."

3) Under Statements of Practical Treatment, following both the skin and the eye statements, add "Get medical attention if irritation persists."

DATA REVIEW FOR ACUTE EYE IRRITATION TESTING (§81-4)

009088

Product Manager: (12)  
 MRID No.: 402708-06  
 Testing Laboratory: MB Res. Labs., PA  
 Author(s): D.M. Malone  
 Species: Rabbit  
 Sex: not given  
 Source: Acc animals  
 Dosage: 0.1ml undiluted  
 Test Material: # 8601507, SENS SPRAY 6N liquid undiluted  
 Quality Assurance (40 CFR §160.12): satisfactory

Reviewer: M. <sup>Woodrow</sup> Waller  
 Report Date: 5-23-89  
 Report No. MB 87-8649D

Summary: (Identify test material)  
 Tox. Category: IV Classification: Core Minimum

Procedure (~~Deviation From §81-4~~): 0.1ml undiluted test material to conjunctival sac of eye of each of 6 rabbits; eyes held closed briefly. (exposed). Eyes examined each week according to Draize on days 1, 2 & 3.

Results:

	Observations (number "positive"/number tested)							
	Hour	Days						
	1	1	2	3	4	7	14	21
Cornea Opacity		0/6	0/6	0/6				
Iris		0/6	0/6	0/6				
Conjunctivae Redness		0/6	0/6	0/6				
Chemosis		0/6	0/6	0/6				
Discharge		0/6	0/6	0/6				

BEST AVAILABLE COPY

Comments: No irritation in any of 6 test rabbits was observed.

DATA REVIEW FOR SKIN IRRITATION TESTING (§81-5)

009088

Product Manager: ( 12 )  
 MRID No.: 402708-07  
 Testing Laboratory: MB Res. Labs. PA  
 Author(s): O.M. Matene  
 Species: Rabbit  
 Age: not given  
 Sex: not given  
 Weight: not given  
 Dosage: 0.5ml <sup>umbilical</sup>  
 Test Material: # 8601607 \* SUNEPRAY 6N Liquid  
 Quality Assurance (40 CFR §160.12): Satisfactory

Reviewer: Woodrow  
 Report Date: 5-23-79  
 Report No.: MB 27-8649 C

Summary:

The Primary Irritation Index = P.I. Index = 2.62

Toxicity Category: III

Classification: Core minimum data. (should have continued experiment)

Procedure (~~Deviations From §81-5~~): 0.5ml to 1 intact and 1 abraded dorsal test sites on clipped backs of 6 rabbits (total of 1ml)  
Each test site covered w/ 2.5cm sq grease/adhesive tape. Tors wrapped w/ plastic/adhesive tape. 24hr contact. Test sites scored for irritation at 24 & 72 hrs post treatment, according to Draize.  
 Results:

AV. irritation scores

Time	Erythema/Eschar	Edema
intact -24	1.83	1.50
-72	1.50	0.50
abraded -24	1.83	1.50
-72	1.33	0.50

P.I. Index = 2.62 = (a slight irritant)
