OFFICE OF  
PESTICIDES AND TOXIC SUBSTANCES

MEMORANDUM

Subject: Second Peer Review of Rotenone - Reevaluation Following the  
September 7, 1988 Science Advisory Panel Review

From: Roger Gardner, Toxicologist  
Review Section 1  
Toxicology Branch I (IRS)/HED (TS-769C)

To: William Miller, Product Manager #16  
Registration Division (TS-767C)

The Peer Review Committee met on September 29, 1988 to examine the issues raised by the Science Advisory Panel (SAP) with respect to the classification of the carcinogenicity of Rotenone.

A. Individuals in Attendance:

1. Peer Review Committee: (Signatures indicate concurrence with the peer review unless otherwise stated).

Robert Beliles

Robert J. Beliles

William Burnam

Wm. J. Burnam

Marion Copley

B. Material Reviewed:

The SAP response memorandum from the September 7, 1988 meeting was reviewed by the Committee.

C. Considerations:

The Science Advisory Panel (SAP) reviewed the weight-of-the-evidence considerations and classification of the oncogenic potential of Rotenone.

The Panel commented as follows:

...the data on oncogenicity of rotenone does not warrant its classification as a Group D oncogen. The Panel endorses the classification of rotenone in Group E because of lack of evidence of carcinogenicity in life-time studies in rats and mice.

D. Conclusions

The Committee agreed with the classification recommended by the Panel.
