MEMORANDUM

SUBJECT: Trichloromelamine: Submission of additional data to upgrade the bobwhite quail study (MRID No. 42280801).

In EEB's most recent review of the data base for trichloromelamine (3/9/94), it was stated that the dietary study with the bobwhite quail (MRID No. 42280801) could not be upgraded to core as the percent active ingredient of the test material was lacking. S.C. Johnson & Son, Inc. has submitted the required data (93.8% a.i.), thus the dietary bobwhite quail study may be upgraded to core and fulfills guideline requirements.

All data requirements for the indoor food/nonfood uses of trichloromelamine are now satisfied (see attached table). If you have any questions, please contact Tracy Perry at 305-6451 or Henry Craven at 305-5320.
