OFFICE OF  
PESTICIDES AND TOXIC SUBSTANCES

MEMORANDUM

SUBJECT:

<sup>Bulk</sup>  
~~bulk~~ ~~call-in for~~ Folpet  
Aquatic Studies

FROM:

Dennis J. McLane *Dennis J. McLane 5-19-88*  
Ecological Effects Branch  
Hazard Evaluation Division (TS-769C)

THRU:

Raymond W. Matheny, Head *Raymond W. Matheny 5-19-88*  
Section 1  
Ecological Effects Branch  
Hazard Evaluation Division (TS-769C)

THRU:

James W. Akerman, Chief *James W. Akerman 5/19/88*  
Ecological Effects Branch  
Hazard Evaluation Division (TS-769C)

TO:

Richard Mountfort, PM23  
Herbicides-Fungicides Branch  
Registration Division (TS-767C)

Recently Eugene Wilson of your team has brought to our attention that the "H" designation of the Registration Standard (RS) Table A which indicates "Domestic outdoor" uses does not include paints and plastic products. EEB erred in defining the requirements for the paint and plastic products. The two studies listed below are required to support the manufacturing use products for reformulation into indoor end use products:

1. 72-1 - Freshwater Fish Toxicity  
- Coldwater Fish Flow-through  
LC<sub>50</sub> Test, preferably with  
rainbow trout
2. 72-2 - Acute Toxicity  
- Freshwater Invertebrate  
Flow-through LC<sub>50</sub>  
Test, preferably with  
Daphnia magna.

It is our understanding that, according to PR 85-5, the registrant will be given nine months to fulfill these data requirements.
