6. **STUDY PARAMETERS:**

Scientific Name of Test Organism: *Anas platyrhynchos*

Age of Test Organisms at Test Initiation: 16 weeks

Definitive Study Duration: 24 weeks

7. **CONCLUSIONS:** This study is scientifically sound but fails to meet the guideline requirements for an avian reproduction study using mallards. Based on significant treatment related reductions in hatchling weight at all test concentrations, the NOEL could not be determined.

Results Synopsis

Most sensitive endpoints: hatchling body weight

NOEC: Not determined
