OFFICE OF
PESTICIDES AND TOXIC SUBSTANCES

MEMORANDUM

Subject: PP# 2F2717. Oryzalin in or on potatoes. Amendment of
10/19/82 (revised Section F).

From: M. Nelson, Chemist *mjn*
Residue Chemistry Branch
Hazard Evaluation Division (TS-769)

Thru: Charles L. Trichilo, Chief
Residue Chemistry Branch
Hazard Evaluation Division (TS-769) *CT*

To: R. Taylor, PM 25
Registration Division (TS-767)

and

Toxicology Branch
Hazard Evaluation Division (TS-769)

In accord with the request in our (M. Nelson) review of 7/29/82,
the petitioner has submitted a revised Section F that proposes
the potato tolerance at 0.05 ppm (down from 0.1 ppm).

This satisfactorily resolves the sole RCB deficiency.

Recommendations

Toxicological considerations permitting, we now recommend for the
establishment of the proposed tolerance for residues of oryzalin
in or on potatoes @ 0.05 ppm.

A Codex Sheet was attached to our earlier review (7/29/82) and
is incorporated herein by reference. There are no Codex,
Canadian, or Mexican oryzalin tolerances to be taken into
consideration.
