and
Marcia van Gemert, Ph.D. *Marcia van Gemert 12/6/93*
Branch Chief
Tox. Branch II/HED (H7509C)

The registrant, Biologic Inc., informed the Agency that they intend to submit additional data to upgrade a chronic feeding study in dogs (MRID No. 423804-01; DP180816). According to the Data Evaluation Record (DER) this study was classified by the Agency as **supplementary** because the report contains many deficiencies. In the opinion of this reviewer most of these deficiencies could be rectified with additional information. It should be noted that this study was conducted in early 1970's, and it ought to be upgraded to meet the current standard as best as the registrant possibly can. Tox. Branch welcomes any effort to improve this study.
