INTRODUCTION

The technical was reviewed previously (dated February 9, 1999) which is a me-too application. In the original application the registrant did not fill properly the EPA Form 8570-1 and did not indicate the EPA Reg. No. of the product to which the registrant is claiming the substantial similarity. The PM 23 team member Mr. Eugene Wilson later on contacted the registrant & determined that the registrant is claiming the substantial similarity to the EPA Registered product with Reg. No. 707-165.

SUMMARY OF FINDINGS

1. The subject product contains oxyfluorfen as the active ingredient with the product label claim of 97.4%.
2. The registered product EPA Reg. No. 707-165 also contains oxyfluorfen as the active ingredient with the product label claim of 72.0%.

CONCLUSION:

The TRB has reviewed and compared the chemical composition of the subject product to the registered product EPA Reg. No. 707-165 and concluded that the two products are not substantially similar from the chemistry point of view.

<u>EPA Reg. No.</u>	<u>Nominal Conc. of AI</u>
11603-EO	97.4%
707-165	72.0%

The impurity profile for the two technical is entirely different.
