Allen Vaughan reviewed the use of oxyfluorfen on strawberries in Connecticut. New Hampshire has also requested the same use. A full review should not be necessary since the acreage is small and a full review was done for Connecticut. A very short memo should suffice in this case.

Fried

MEMORANDUM

SUBJECT: Emergency exemption for use of oxyfluorfen
on strawberries in New Hampshire (D204217)

FROM: *for* Anthony F. Maciorowski, Chief
Ecological Effects Branch
Environmental Fate and Effects Division (7507C)

Douglas J. L. L. L.

As noted in the Data Review Instructions, this request is for an exemption identical to one recently reviewed for Connecticut (D203458). That review concluded that the proposed use would not result in hazard to terrestrial wildlife, aquatic organisms, or nontarget plants. Since this exemption has the same end-use product, target pests, use period, and application rate, EEB's conclusions for nonendangered species are the same.

The only potential concern with the current exemption relates to endangered species of plants, as three endangered plant species are found in New Hampshire. Review of habitat information indicates that none of these species are likely to be exposed via application to strawberries. Thus, hazard to endangered species is not a concern.

Questions or comments on this memo should be directed to Allen Vaughan (305-6464).
