TO: William H. Miller, PM# 16
Insecticide-Rodenticide Branch
Registration Division (TS-767C)

Zoecon Corporation has submitted a revised label for Zoecon RF-256 Aerosol. The registrant had previously requested to register Zoecon RF-256 Aerosol (propetamphos) as a crack and crevice treatment for the control of cockroaches and other pests in food handling establishments. This request was denied (See L. Propst memos dated 9/26/85 and 5/5/86) because the concentration of propetamphos exceeded the maximum 1% specified in 21 CFR 193.375.

A tolerance of 0.1 ppm has been established for residues of the insecticide propetamphos ([(e)-]-methylethyl 3-[[(ethylamino) methoxyphosphinothioyl]-2-butenate]) in food commodities exposed to the insecticide during treatment of food-handling establishments. Direct application shall be limited solely to spot and/or crack and crevice treatment in food-handling establishments where food and food products are held, processed, prepared, or served. Spray and dust concentrations shall be limited to a maximum of 1 percent active ingredient. For crack and crevice treatment, equipment capable of delivering a dust or a pinstream of spray directly into cracks and crevices shall be used. For spot treatment, a coarse, low-pressure spray shall be used to avoid contamination of food or food-contact surfaces (21 CFR 193.375).

The revised label for this aerosol propetamphos formulation now limits the maximum concentration of active ingredient to 1%. The revised label also limits application within food areas of food handling establishments to crack and crevice treatment only with application being made with a crack and crevice extension tube or equipment capable of delivering the spray directly into cracks and crevices.

Conclusions and Recommendations

All concerns Dietary Exposure Branch had with registering Zoecon RF-256 Aerosol for use in food handling establishments have been alleviated with the revised label.

We can now recommend favorably for registering Zoecon RF-256 Aerosol for use in food handling establishments.
