

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

DATE: 4-21-78

SUBJECT: Attendance of Environmental Chemistry Personnel at Registration Meeting.

FROM: Product Manager (16), Insecticide-Rodenticide Branch
Registration Division (WH-567)

TO: Dr. Rogoff, Pesticide Science Officer
Registration Division (WH-567)

It is requested that Mr. Ronald Ney or a member of his staff from the environmental chemistry section attend a meeting for the purpose described below.

It is my understanding that this formal request is necessary due to the amount of time presently needed for the several priority reviews of cotton petitions and registrations.

Sandoz Chemical Company has requested a meeting at 9:45 on April 28, 1978 for about 15 minutes for the purpose of ascertaining the environmental data requirements for a PCO use product on turf and ornamentals. It is a new chemical, 1-methylethyl (E) - 3 [(ethyl-amino) methoxyphosphinothioyl] oxy]-2-butenate.

Please respond to this request by April 24, 1978.
