SUBJECT: Safrotin EC (Reg. No. 11273-22); request for written
confirmation on the adequacy of existing fish and
wildlife acute toxicity data

Regarding Sandoz, Inc.'s request for written confirmation on the adequacy of existing fish and wildlife acute toxicity data for the proposed building perimeter use of Safrotin™ EC Insecticide, please note that these data are sufficient for this use, as was noted in the 2/9/82 meeting with the registrant (memorandum of conference attached). This was previously explained in writing in EEB's 10/1/81 Review (Sections 107.4 and 107.5), an additional copy of which is also attached.

Please note that the Daphnia LC₅₀ value of 14.27 ppm cited in J. Leitzke's review of 6/15/79 is in error. The value should read 14.27 ppb. The 10/1/81 EEB Review and 2/9/82 Memorandum have also been amended to reflect this correction.
