TO: Joanne Miller, PM-23
Fungicide-Herbicide Branch
Registration Division (H7505)

The Ecological Effects Branch passes the new chemical screen for Flumiclorac Pentyl Ester (Shaughnessy No. 128724). This herbicide is to be labeled for corn and soybeans. The bee, avian reproduction and estuarine studies were submitted in addition to the six basic studies. Plant studies are not required since the solubility is less than 10 ppm, the vapor pressure is less than 1.0×10^{-5} mm Hg, and application is by ground only.
