

7-3-95

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

MEMORANDUM

JUL 3 1995

OFFICE OF
PREVENTION, PESTICIDES AND
TOXIC SUBSTANCES

Subject: BPPD Review of Data Submitted by The University of California and the Association for Sensible Pest Control in Support of an Exemption from the Requirement of a Tolerance for Specific T-1 [Granulosis Virus of Cydia pomonella] (Submission No.: S489644; ID No.: 058042-R; DP Barcode No.: D216983; Chemical No.: 129090).

To: Linda Hollis, Regulatory Action Leader
Biological and Pollution Prevention Division (H7501W)

From: Cindy Schaffer, Microbiologist *C. Schaffer*
Biological and Pollution Prevention Division (H7501W)

Action: BPPD has been asked to review data in support of the exemption from the requirement of a tolerance from the University of California and the Association for Sensible Pest Control's product, Specific T-1 [containing the Granulosis virus of Cydia pomonella].

Background:

The University of California and the Association for Sensible Pest Control previously submitted data in support of a registration for Specific T-1. BPPD has approved the registration of this product (see 7/13/94 memorandum from J. Kough to L. Hollis and 4/11/95 memorandum from C. Schaffer to L. Hollis).

Discussion/Conclusion:

BPPD accepts the petition for a tolerance exemption based on a lack of mammalian toxicity and the lack of infectivity presented in the cell culture assays.
