

CANTHARELLA (MUSHROOM) BLEACH CONTACT INFORMATION

RINSE METHOD - Prepare a sanitizing solution by thoroughly mixing 6 oz. of this product with 10 gallons of water to provide approximately 600 ppm available chlorine by weight. Clean surfaces in the normal manner. Prior to use, rinse all surfaces thoroughly with the sanitizing solution, maintaining contact with the sanitizer for at least 2 minutes. Do not rinse equipment with water after treatment and do not use equipment overnight.

IMMERSION METHOD - Prepare a sanitizing solution by thoroughly mixing, in a clean 1/2 gal. jar, 1 oz. of this product with 10 gallons of water to provide approximately 600 ppm available chlorine by weight. Clean equipment in the normal manner. Prior to use, immerse equipment in the sanitizing solution for at least 2 minutes and allow the sanitizer to drain. Do not rinse equipment with water after treatment.

SPRAY BOTTLE METHOD - After cleaning, sanitize non-food contact surfaces with 600 ppm available chlorine by thoroughly mixing the product in a ratio of 6 oz. of this product with 10 gallons of water. Use spray or fogging equipment which can contain hypochlorite solutions. Always empty and rinse spray/fog equipment with potable water after use, prior to using equipment, thoroughly spray or fog all surfaces until wet. Allow excess sanitizer to drain. Vacate area for at least 30 minutes.

EGG BLEACH SANITIZATION - Thoroughly clean all eggs. Thoroughly mix 2 oz. of this product with 10 gallons of warm water to produce a 200 ppm available chlorine solution. The sanitizer temperature should not exceed 130° F. Spray the warm sanitizer so that the eggs are thoroughly wetted. Allow the eggs to thoroughly dry before cooking or breaking. Do not apply a potable water rinse. The solution should not be reused to sanitize eggs.

USE OF THIS PRODUCT: - This product is to be used as a sanitizer. It is not to be used as a disinfectant or as a general purpose cleaner. This solution is not for food contact use.
