c. Add an ENVIRONMENTAL HAZARD statement as follows:

ENVIRONMENTAL HAZARD

Do not apply to water except as specified under directions.

3. Submit one (1) copy of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with PIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS - DANGER

Corrosive. Causes irreversible eye damage. Do not get into eyes. Wear goggles or face shield. May be harmful or fatal if swallowed.

Statement of Practical Treatment

If in eyes immediately flush with plenty of water for at least 15 minutes. For eyes, call a physician. If swallowed drink promptly a large quantity of milk, egg white, or gelatin solution: if these are not available, drink large quantities of water. Call a physician immediately. Avoid alcohol. NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respir-

atory depression and convulsion may be needed.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

<u>Storage</u>: Store in a cool, dry place in an area inaccessible to children or pets. <u>Pesticide Disposal</u>: Securely wrap container in several layers of newspaper and discard in trash. <u>Container Disposal</u>: Do not reuse empty container. Empty completely and discard in trash. Avoid contamination of feed and feed by storage and disposal.

<u>GENERAL INFORMATION</u>: Roots of shrubbery and trees growing near sewer lines frequently penetrate sewer lines in search of moisture and nutrients, even through extremely small crakes, holes, or poorly sealed joints. These tiny root hairs, if not controlled, will continue to grow both in diameter and number, causing tile breakage, gradual reduced flow, and frequently flow stoppage.

Make treatment when the reduced flow rate thought to be caused by root growth is first noticed. Do not delay until stoppage has occurred because a slight flow is needed to move copper sulfate crystals to root growth. When roots accumulate sufficient copper sulfate to cause death, root decay will begin and flow rate should increase in 3 to 4 weeks. Since copper sulfate treatment usually kills only those roots in the pipe, roots will regrow, requiring follow-up treatments. Generally make a treatment in the spring after plants begin to grow, with a second treatment during late summer or early fall each year, and/or any time when reduced flow possibly caused by root growth is noted. Root Destroyer is not

SOFS

BONIDE ROOT DESTROYER, EPA Reg. No. 4-

HOW TO USE ROOT DESTROYER COPPER SULFATE: In household sewers use 2 to 6 pounds of Root Destroyer twice yearly as discussed before. Add to sewer line by pouring about 1/2 pound into the toilet bowl marest to the sewer line and flush, repeating process until recommended dose has been added, or remove cleanout plug and pour entire recommended quantity directly into the sewer line, replacing plug and flush toilet several times. Note: Do not apply copper sulfate through sink or tub drains as it will corrody these metal drains. If complete stoppage occurs, rodding may be necessary to assure some flow before treatment. If system is equipped with a septic tank, copper sulfate will be precipitated in the septic tank and little will pass into the absorption drain field. To treat drain field pipes, add 2 to 6 pounds of crystals to distribution box located between the septic tank and the drain field. If distribution box does not have an opening, it would be advisable to install a cleanout plug opening into the outlet pipe from the septic tank leading to the drain field for effective root control in the drain field pipes.

<u>Storm Drains</u> - Use 2 pounds of Root Destroyer Copper Sulfate per drain per year. Apply during period of light water flow. In dry weather, introduce a flow with a hose. If storm drains become almost plugs, repeat treatment 3 or 4 times at 2-week intervals.

Sewer Pumps and Force Mains - Place 2 pounds in a cloth bag at the storage well inlet. Repeat as needed.

Buyer's Warranty Limited to Label Claims.
