**CAUTION: FLAMMABLE MIXTURE.  
DO NOT USE NEAR FIRE OR FLAME**  
N.Y.F.D.C. of A. No. 2648

**GENERAL INFORMATION:** Recommended for use as a spray against rabbit and deer damage to ornamental trees and shrubs only. It is not recommended for use on vegetables and other food producing plants. This product contains a built-in sticking agent which is soluble in water but forms an insoluble emulsion after drying. The sticking agent should hold the active ingredient on the plant even when exposed to adverse weather conditions.

**DIRECTIONS:** Shake well before mixing with water. Keep diluted material agitated while using. Do not add any detergent or wetting agent to this product. If detergent is added, the effectiveness of the sticking agent contained in the product will be destroyed. It is suggested that one part by volume of NIBONeX Liquid Rabbit Repellent Concentrate be mixed with four parts of water and applied with a sprinkling can or pump brush to trunk and lower branches of trees and shrubs.

**NOTE:** The product will clog some nozzles even when constantly agitated. After use, wash containers and equipment with a strong detergent and water. Do not allow to dry in equipment. Flush thoroughly with clean water to remove detergent residue.

**CAUTION:** May be harmful if swallowed. May cause irritation of nose, throat, and skin. Avoid breathing spray mist. Keep out of reach of children. Use with adequate ventilation. Avoid contact with eyes, skin or clothing. Always wash thoroughly after using. For eyes flush with plenty of water and seek medical attention. Do not re-use containers for packaging food or feed for humans or animals.

CELLARVILLE, Effective for purposes claimed

**ACTIVE INGREDIENTS:** Zinc dimethyldithiocarbamate-cyclohexylamine complex (equivalent to .95% Zn as metallic) 7 %  
**INERT INGREDIENTS** ..... 93 %
