

BIOTROL® 16K

WETTABLE POWDER

BIOLOGICAL INSECT CONTROL

ACTIVE INGREDIENT:

Bacillus thuringiensis Berliner..... 3.20%
Contains 16,000 International Units of Potency per milligram of product (a minimum of 25 billion viable spores per gram). Equivalent to 7.26 billion International Units per pound.

INERT INGREDIENTS

..... 96.80%

TOTAL: 100.00%

**KEEP OUT OF REACH OF CHILDREN
CAUTION**
Avoid inhalation or contact with eyes or open wounds. Do not re-use container. Destroy when empty. See side panel for additional precautionary statements.

BIOTROL is the registered trademark of Nutrilite Products, Inc.

Buena Park, Calif. 90620

Manufactured under Patent # 3,086,922.

MANUFACTURED BY NUTRILITE PRODUCTS, INC., 5600 BEACH BLVD., BUENA PARK, CALIF. 90620

EPA Establishment No. 6296-CA-1

EPA Registration No. 6296-28

NET CONTENTS **108** LOT

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS (& DOMESTIC ANIMALS)**
CAUTION: Avoid contact with eyes. In case of contact wash eyes with plenty of water. If irritation persists, call a physician.

ENVIRONMENTAL HAZARDS
Avoid application to lakes, ponds, streams. Do not contaminate water by cleaning of equipment or disposal of wastes.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL: Begin spray applications when larvae are first noticed. BIOTROL 16K wettable powder must be ingested by the larvae to be effective; therefore, thorough under-leaf coverage is essential for best control. Repeat at weekly intervals to maintain control.

MIXING: Partially fill spray tank with water, then pour recommended amount of 16K onto water's surface. Spray tanks equipped with 2-pass agitation only should maintain pump circulation at full capacity until mixing is complete. The higher application rates should only be used in case of heavy worm infestation or dense growth. Chemical insecticides, fungicides, spreader-stickers, and stickers in the tank are generally not harmful to BIOTROL 16K Wettable Powder if the mix is used promptly.

GROUND APPLICATION: Use recommended amount of BIOTROL 16K Wettable Powder in 5 to 100 gallons of water, depending on the type of application equipment and crop. For trees, use recommended amount of BIOTROL 16K Wettable Powder in 50-100 gallons water in high pressure, high gallonage, hydraulic sprayer. For mist blowers, use recommended amount in 8-10 gallons of water. Thorough foliage coverage is essential for best results but not to the point of excessive run-off.

AERIAL APPLICATION: Use 5 to 10 gallons of water with recommended amount of BIOTROL 16K Wettable powder. Application should begin in early morning or evening when air is calm.

STORAGE AND DISPOSAL

STORAGE: Reclose containers of unused BIOTROL. Store in a cool dry place.

DISPOSAL: Do not reuse container. Perforate or crush and discard empty container according to local trash disposal regulations.
