Office of Pesticide Programs
Antimicrobials Division (7510C)
1200 Pennsylvania Avenue, N.W.
Washington, D.C. 20460

EPA Reg. Number: 100-1197

Date of Issuance: NOV 30 2004

NOTICE OF PESTICIDE:
[x] Registration
Reregistration

(under FIFRA, as amended)

Term of Issuance:
CONDITIONAL

Name of Pesticide Product:
Azoxystrobin Mold-Retardant 2.08 SC

Name and Address of Registrant (include ZIP Code):

Syngenta Crop Protection, Inc.
P.O. Box 18300
Greensboro, NC 27419

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

- 1. Submit and/or cite all data required for registration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.
2. Add the phrase EPA Registration Number "EPA Reg. No. 100-1197".

Signature of Approving Official:

Regulatory Management Branch 1
Antimicrobial Division (7510C)

Date:

NOV 30 2004

CONCURRENCES

Table with 3 rows (SYMBOL, SURNAME, DATE) and 8 columns for recording concurrences.

3. Place the following statements within the body of the label immediately following the signal word "CAUTION" on page one: "For Use By Commercial/Professional Applicators Only" and "Not for application by homeowners".

4. As this product has not been assessed for exposure to residential applicators and is intended only for use by commercial/professional applicators, the size of the package in which this product is to be sold is limited to containers in sizes of 5 gallons and greater. In addition this product is only to be marketed through distribution and sales channels which supply commercial and professional cleaning and remediation businesses. This product is not to be marketed through retail consumer outlets such as Big Box Stores, grocery stores, home improvement outlets such as Lowe's and Home Depot as well as consumer internet outlets. If you wish to change the container sizes used for this product, such a change must be done via amendment as an additional risk assessment for residential users may be warranted.

5. Revise the Storage and Disposal statements on page five by deleting the following statement from the Pesticide Storage section and placing this statement in the Pesticide Disposal section: "In case of spill on floor or paved surfaces, mop and remove to chemical waste storage area until proper disposal can be made if product cannot be used according to the label."

6. Revise the General Information section on page five by adding the following text to clarify what is intended by the term "structural wood": "including exposed joists, or subflooring in basements, crawlspaces, attics and garages, as well as exposed drywall or particleboard in same or similar areas."

7. Add the following to the General Use Precautions section on page five: "For Use By Commercial/Professional Applicators Only" and "Not for use in areas where food/feed items are present or may be present."

8. Revise page six by adding the following statement immediately following the statement beginning: "This product is for preventative and remedial control..." add "Before applying this product, visible mold growth must be removed and conditions favorable to mold growth must be identified and corrected."

9. Move the statements beginning: "Strategies to respond to water damage..." and ending "...for more information on how to cleanup after water damage." to the Mold Remediation Methods section at the bottom of page eight.

10. Revise page seven by correcting the section beginning: "Dry carpets within 24 hours to prevent conditions..." to read: "...or other methods of ventilation should be used..." In addition, revise this page such that this section is repeated in the "Broadcast treatment" and "Spot Treatment" sections.

11. Revise the first section on page eight beginning: "Apply to exposed and/or structural wood surfaces..." to read as follows: "...Examples include exposed joists or subflooring..." by deleting the reference to "exterior decking" as the claim for this product on page one indicates that

SYMBOL	for control of "fungi associated with indoor odor, staining..."						
SURNAME							
DATE							

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

page 3

EPA Reg. No. 100-1197

12. Revise the second section on page eight beginning: "Dry wood and drywall within 24 hours..." to read "...or other methods of ventilation *should be used...*"

13. Revise the heading on page eight "Other Hard, Non-porous Surfaces" to read "Hard Non-Porous Surfaces" as all other surfaces indicated on the label are porous surfaces.

14. Revise the first section in the "Hard Non-Porous Surfaces" section to read "...the growth of molds and mildews that cause odor, staining and discoloration *on hard non-porous surfaces in areas...*" Also add the following statement to the end of this section: "*Do not use in areas where food is prepared or stored.*"

15. Revise the Mold Remediation Methods on page eight by adding: "...Remediation of moldy carpets in not recommended, moldy carpet *and padding* should be removed and discarded." In addition, add the following statement to this section of the label: "*Before applying this product, visible mold growth must be removed and conditions favorable to mold growth must be identified and corrected.*"

16. Revise page nine by deleting the following statement: "If there is doubt items should be tested by professionals." As there is currently no standard for acceptable levels of mold spores in an indoor environment, testing by professionals is not an appropriate recommendation.

17. Revise the "Wood Surfaces" section on page nine by revising to state: "...clean the affected area using the following or another preferred professional method *appropriate to this type of clean up.*" Make this same change to the "Wood Surfaces" sections on page ten and page eleven.

18. Revise the "Wallboard" sections on pages ten and eleven as follows:

A. Revise "Method 2" by deleting "if present." as the labeling has previously indicated that the area must be contained.

B. Revise the section beginning: "Limited or full personal..." to read as follows: "...recommended during cleanup. *Use professional judgement to determine the appropriate level of PPE considering the potential for remediator exposure and size of contaminated area.* Limited...foot coverings *and a full-face respirator with HEPA filter.*"

19. The directions on page twelve are for remediation treatment. As such delete the following statement in the fourth section which is not in agreement with remediation treatment: "Make application as part of a routine cleaning program."

20. Revise the last section on page twelve as follows: "...or other methods of ventilation *should be used...*"

21. In the directions for various surfaces on page thirteen revise the section on carpet to read "Remediation of moldy carpets is not recommended, moldy carpet *and padding* should be removed and discarded."

page 4

EPA Reg. No. 100-1197

22. Revise the last section on page thirteen in the "Wood and Drywall" section as follows: "...or other methods of ventilation *should be used...*"

23. Revise the heading on page thirteen "Other Hard, Non-porous Surfaces" to read "Hard Non-Porous Surfaces" as all other surfaces indicated on the label are porous surfaces.

24. Revise the first section in the "Hard Non-Porous Surfaces" section to read "...the growth of molds and mildews that cause odor, staining and discoloration *on hard non-porous surfaces* in areas..." Also add the following statement to the end of this section: "*Do not use in areas where food is prepared or stored.*"

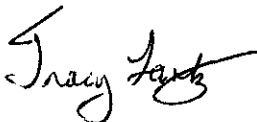

25. Make the following corrections in the "Hard Non-Porous Surfaces" section: "...glazed porcelain, *bathtubs* and shower stalls *made of fiberglass...*"

General Comments

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records. Submit one (1) copy of the final printed label prior to the release of the product for shipment. If you have any questions concerning this letter, please contact Tracy Lantz at (703) 308-6415.

Sincerely,

for

Azoxystrobin Mold Spray 2.08 SC

A fungistatic agent that controls and/or inhibits the growth of many fungi associated with indoor odor, staining, discoloration, molds and mildews. This product is not intended to protect users or others against food-borne or disease causing organisms. This product is not for use in food/feed handling areas

Active Ingredient:

Azoxystrobin: methyl (E)-2-[2-[6-(2-cyanophenoxy)pyrimidin-4-yloxy]phenyl]-3-methoxyacrylate* 22.9 %

Other Ingredients: 77.1%

Total: 100.0%

Contains 2.08 lbs. of active ingredient per gallon.

*IUPAC (International Union of Pure and Applied Chemistry designation)

KEEP OUT OF REACH OF CHILDREN.

CAUTION

See additional precautionary statements and directions for use described below or inside booklet.

Reformulation is prohibited. See individual container labels for repackaging limitations.

CONDITIONS OF SALE AND LIMITATION OF WARRANTY AND LIABILITY

NOTICE: Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying or using this product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.

The Directions for Use of this product should be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Ineffectiveness or other unintended consequences may result because of such factors as manner of use or application, presence of other materials or other influencing factors in the use of the product, which are beyond the control of SYNGENTA CROP PROTECTION, Inc. or Seller. All such risks shall be assumed by Buyer and User, and Buyer and User agree to hold SYNGENTA and Seller harmless for any claims relating to such factors.

SYNGENTA warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the inherent risks referred to above, when used in accordance with directions under normal use conditions. This warranty does not extend to the use of this product contrary to label instructions, or under abnormal conditions or under conditions not reasonably foreseeable to or beyond the control of Seller or SYNGENTA, and Buyer and User assume the risk of any such use. SYNGENTA MAKES NO WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.

In no event shall SYNGENTA or Seller be liable for any incidental, consequential or special damages resulting from the use or handling of this product. **THE EXCLUSIVE REMEDY OF THE USER OR BUYER, AND THE EXCLUSIVE LIABILITY OF SYNGENTA AND SELLER FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE) RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT OR, AT THE ELECTION OF SYNGENTA OR SELLER, THE REPLACEMENT OF THE PRODUCT.**

SYNGENTA and Seller offer this product, and Buyer and User accept it, subject to the foregoing Conditions of Sale and Limitation of Warranty and Liability, which may not be modified except by written agreement signed by a duly authorized representative of SYNGENTA.

STORAGE AND DISPOSAL

Prohibitions

Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage

Store in original containers only. Keep container tightly closed when not in use. Store in a secure area inaccessible to children and away from food or feed. In case of spill on floor or paved surfaces, mop and remove to chemical waste storage area until proper disposal can be made if product cannot be used according to the label.

Pesticide Disposal

Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Plastic Container Disposal

Triple rinse (or equivalent); then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by State and local authorities, by burning. If burned stay out of smoke.

DO NOT USE CONTAINER FOR FOOD, FEED, OR DRINKING WATER.

GENERAL INFORMATION

Azoxystrobin Mold Spray inhibits the growth of molds and mildews that cause odor, staining and discoloration to carpet, structural wood, and other surfaces. It provides an invisible coating and barrier to inhibit the fungal organisms associated with mold and mildew that cause odor, staining and discoloration.

Under the Fungicide, Disinfectant, and Sanitizer Act of 1974, Azoxystrobin Mold Spray is registered under EPA Reg. No. 100-1197

For use in homes, vehicles, institutions such as schools, public buildings, daycare centers, hospitals, nursing homes, churches, and correctional facilities; and commercial buildings such as transportation terminals, warehouses, office buildings, manufacturing facilities, lodging establishments, retail businesses and athletic/recreational facilities.

GENERAL USE PRECAUTIONS

NOT for application by homeowners.
NOT for use in areas where food/feed items are present.

Keep children, pets, patients, residents and any bystanders out of the room or area during remediation and application. Keep children and pets off treated areas until spray has dried following application.

Apply as needed, but do not exceed 4 applications per year to the same surface or area.

10/18

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product is for preventative and remedial control/inhibition of fungi (molds, mildews) that cause odor, discoloration or staining.

Water Damage Remediation

Strategies to respond to water damage within 24-48 hours are a key part of avoiding mold contamination due to water incursion. Use professional judgment, consult with local experts and/or refer to EPA guidance documents such as ("*Mold Remediation in Schools and Commercial Buildings*", www.epa.gov/mold/moldresources.html) for more information on how to cleanup after water damage.

If mold or mildew is present follow the Mold Remediation Methods section of this label before treating.

Directions for Use as a Preventative Treatment: Spraying and Mixing

Prior to application, thoroughly clean surfaces to remove loose existing dirt. Follow specific directions for surfaces listed on this label.

Prepare a solution by adding the required amount of Azoxystrobin Mold Spray 2.08 SC to ½ the final volume of water in the spray container, mix thoroughly, and add the remaining ½ volume of water to the container. Prepare no more mixture than is necessary for the immediate use.

To prepare the spray solution, add 0.50 fl. oz. (1 tablespoon) of Azoxystrobin Mold Spray to 1 gallon of water (0.1%, 1000 parts per million) and mix thoroughly. Apply 1 gallon of solution per 250 to 800 square feet of application surface. See detailed instructions for each surface type. Volumes of water should be adjusted to deliver the proper amount of water for treatment of the surfaces listed below without excessive wetting or soaking. Conduct trial application with water alone to determine appropriate volume. During application, do not allow excessive soaking, saturation, dripping or runoff to occur. Evenly apply to the surfaces listed below.

Apply as needed for prevention of molds and mildews that cause odors, discoloration or staining, but do not exceed 4 applications per year to the same surface or area. Make applications as part of a routine cleaning program.

If the application is made in a large volume of water in enclosed spaces, that area should be dried as soon as possible to prevent conditions favorable to mold growth. To assist the drying process after cleaning, and application of this product use of fans, dehumidifiers, heaters or other methods of ventilation are encouraged. Please consult

SPECIFIC DIRECTIONS FOR VARIOUS SURFACES

CARPET

Spot test an inconspicuous area of carpet with the prepared spray solution to insure dyes will not bleed or that staining will not occur.

Carpets should be vacuumed thoroughly and vacuum cleaner bag discarded in an outdoor trash container prior to spray treatment.

- **Broadcast treatment** using commercial carpet-cleaning equipment (e.g., carpet steamers, rotary jet extraction cleaners, pressure sprayers):
 - Mix in tank as described above. Evenly apply the prepared 0.1% solution over the carpet using 1 gallon of solution per 250 to 800 square feet. Conduct trial application with water alone to determine appropriate volume described in the Spraying and Mixing Section. Apply sufficient amount to dampen carpet. Do not soak, or allow dripping or run-off to occur. Any drips or run-off should be blotted dry with a disposable cloth or sponge. Allow carpet to dry before re-entry.
- **Spot treatment:**
 - Use a pump sprayer with wand. Hold the end of the wand 4-6 inches from the surface, using smooth back and forth motions to cover the entire target area to ensure complete coverage, dampen but do not soak surface. Any drips or run-off should be blotted dry with a disposable cloth or sponge. Allow areas to dry before re-entry.
 - Dry carpets within 24 hours to prevent conditions favorable to mold growth. To assist the drying process after cleaning, and application of this product use of fans, dehumidifiers, heaters or other methods of ventilation are encouraged. Please consult with your local county extension office or EPA, www.epa.gov/mold/moldresources.html for more information.

WOOD AND DRYWALL:

Apply to exposed and/or structural wood surfaces and drywall to prevent and control mold and mildew. Examples include exterior decking, and exposed joists or subflooring in basements, crawlspaces, attics and garages, as well as exposed drywall or particleboard in same or similar areas. Heavily soiled areas must be precleaned prior to application. NOT for use in areas where food/feed items are present. Use a pump sprayer with wand. Hold the end of the wand 4-6 inches from the surface, using smooth back and forth motions to cover the entire target area to ensure complete coverage, dampen but do not soak surface. If soaking or drips do occur, blot dry with a disposable cloth or sponge. Allow areas to dry before re-entry.

Dry wood and drywall within 24 hours to prevent conditions favorable to mold growth. To assist the drying process after cleaning, and application of this product use of fans, dehumidifiers, heaters or other methods of ventilation are encouraged. OTHER HARD, NON-POROUS SURFACES:

This product is not for use in food/feed handling areas.

NOV 30 2004

This product inhibits the growth of molds and mildews that cause odor, staining and discoloration in areas such as bathrooms/restrooms, garbage storage areas, basements, and other areas prone to mold and mildew. Use Azoxystrobin Mold Spray in a pump sprayer as a spot treatment to treat the following surfaces: floors, walls, painted surfaces, metal surfaces, stainless steel surfaces, glazed ceramic tile, glazed porcelain, bathtubs and shower stalls made of fiberglass, plastic surfaces, vinyl surfaces; as well as Formica, granite, marble, or other polished stone surfaces. Spot test on an inconspicuous area before use. Remove visible dirt or soil prior to application. Use a pump sprayer with wand. Hold the end of the wand 4-6 inches from the surface, using smooth back and forth motions to cover the entire target area to ensure complete coverage, dampen but do not saturate surface. If drips do occur, dry with a disposable cloth, sponge or mop. Allow areas to dry before re-entry.

Under the Federal Insecticide, Fungicide, and Rodenticide Act
100-1197

MOLD REMEDIATION METHODS:

Use this product in remediation situations according to the cleanup instructions that follow for the surface affected. After remediation is complete follow the directions for use. Remediation of moldy carpet is not recommended, moldy carpet should be removed and discarded.

Remediation is required in situations where mold growth has occurred or materials have

13/18

been wet for more than 48 hours. Even if materials are dried within 48 hours, mold growth may have occurred. If there is doubt items should be tested by professionals. Note that mold growth will not always occur after 48 hours; this is only a guideline. Always discard porous items that cannot be cleaned. Azoxystrobin Mold Spray is not for use in situations where materials have been wet for more than 7-days and/or visible mold growth cannot be cleaned from the surfaces. Use professional judgment, consult with local experts and/or refer to EPA guidance documents such as ("*Mold Remediation in Schools and Commercial Buildings*", www.epa.gov/mold/moldresources.html) for more information on remediating building materials with mold growth.

Small Areas – Total Surface affected is Less than 10 Square Feet

WOOD SURFACES
Cleanup Methods*

Prior to applying Azoxystrobin Mold Spray, clean the affected area using one of the following or another preferred professional method.

- Method 1: Wet vacuum (in the case of porous materials, some mold spores/fragments will remain in the material but will not grow if the material is completely dried).
- Method 2: Damp-wipe surfaces with plain water or use a wood floor cleaner; scrub as needed.
- Method 3: High-efficiency particulate air (HEPA) vacuum after the material has been thoroughly dried. Dispose of the contents of the HEPA vacuum in a well-sealed plastic bag(s).

Minimum personal protective equipment to be worn during clean-up includes gloves, N-95 respirator and goggles/eye protection.

WALLBOARD (DRYWALL AND GYPSUM BOARD)
Cleanup Methods*

Prior to applying Azoxystrobin Mold Spray, clean affected area using a HEPA vacuum after the material has been thoroughly dried. Dispose of the contents of the HEPA vacuum in a well-sealed plastic bag(s).

Minimum personal protective equipment to be worn during clean-up includes glove, N-95 respirator and goggles/eye protection.

Remediation of moldy carpet is not recommended, moldy carpet should be removed and discarded.

WOOD AND DRYWALL:

Apply to exposed and/or structural wood surfaces and drywall to prevent and control mold and mildew. Examples include exterior decking, and exposed joists or subflooring in basements, crawlspaces, attics and garages, as well as exposed drywall or particle board in same or similar areas. Heavily soiled areas must be precleaned prior to application. NOT for use in areas where food/feed items are present. Use a pump sprayer with wand. Hold the end of the wand 4-6 inches from the surface, using smooth back and forth motions to cover the entire target area to ensure complete coverage, dampen but do not soak surface. If soaking or drips do occur, blot dry with a disposable cloth or sponge. Allow areas to dry before re-entry.

Dry wood and drywall within 24 hours to prevent conditions favorable to mold growth. To assist the drying process after remediation and application of this product use of fans, dehumidifiers, heaters or other methods of ventilation are encouraged. Please consult with your local county extension office or EPA, www.epa.gov/mold/moldresources.html for more information.

OTHER HARD, NON-POROUS SURFACES:

This product is not for use in food/feed handling areas.

This product inhibits the growth of molds and mildews that cause odor, staining and discoloration in areas such as bathrooms/restrooms, garbage storage areas, basements, and other areas prone to mold and mildew. Use Azoxystrobin Mold Spray in a pump sprayer as a spot treatment to treat the following surfaces: floors, walls, painted surfaces, metal surfaces, stainless steel surfaces, glazed ceramic tile, glazed porcelain, (bathtubs and shower stalls mad of fiberglass, plastic surfaces, vinyl surfaces; as well as Formica, granite, marble, or other polished stone surfaces. Spot test on an inconspicuous area before use. Remove visible dirt or soil prior to application. Use a pump sprayer with wand. Hold the end of the wand 4-6 inches from the surface, using smooth back and forth motions to cover the entire target area to ensure complete coverage, dampen but do not saturate surface. If drips do occur, dry with a disposable cloth, sponge or mop. Allow areas to dry before re-entry.

***Special Procedures:**

In the absence of access to the guidance and standard identified, the user should refer to the following information taken from the U.S. EPA's guide: "*Mold Remediation in Schools and Commercial Buildings (March 2001)*". These guidelines are designed to protect the health of occupants and cleanup personnel during remediation. These guidelines are based on the area and type of material affected by water damage and/or mold growth. Please note that these are guidelines; some professionals may prefer other cleaning methods. Use the appropriate remediation steps prior to application of Azoxystrobin Mold Spray.
