

KRS

Kills Screw Worms (*Cochliomyia hominivorax*) and other common wound maggots (*Cochliomyia macellaria*) (*Lucilia sericata*) and (*Phormia regina*). Protects wounds against reinfestation with these parasites for reasonable time. Will not rub off, melt off in the sun, or wash off in the rain.

DIRECTIONS

1. Shake can. Point arrow on nozzle toward animal.
2. Hold can upright 4" to 6" from affected area and press down on spray nozzle.
(If nozzle should clog, pull off spray head and clean by passing a fine wire through the opening.)

TREATMENT AND PREVENTION

Spray K-R-S directly into superficial wounds and cuts to kill screw worms or other common wound maggots, and for an inch or so around the wound to prevent further attacks. Repeat as necessary to keep the wound protected until healed.

WARRANTY

We warrant that at the time of manufacture this product was true to label.

Factors beyond our control, e.g. storage, diagnosis, dosage and biological differences in individual animals, could affect the efficacy of this product or even cause an ill effect. Therefore it is important that directions be followed carefully.

This statement is in lieu of any other warranty, express or implied, including warranties of merchantability or fitness. Representatives of this company are not authorized to vary the terms of this warranty or the contents of the printed labeling for this product except by printed notice from the Company's Berkeley Office.
