**WARFARAT  
CRUMBLES**

Inspect Warfarat Crumbles bait stations regularly. For the first week, the bait stations should be inspected daily to make sure the rats are eating and to assure proper location. Always make sure ample stations are placed and filled with Warfarat Crumbles.

Contaminated or spoiled bait should be replaced promptly.

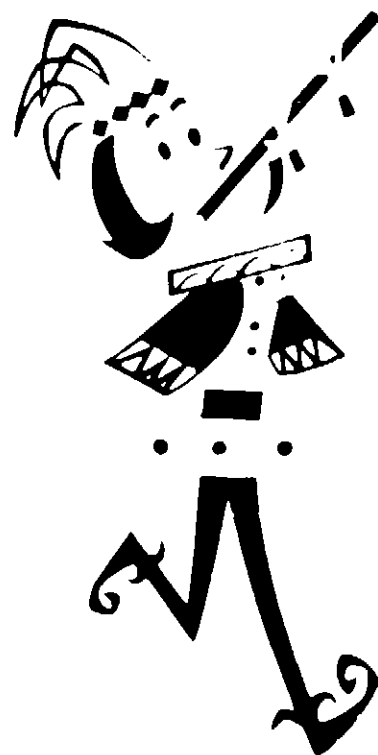

In most cases, a period of 15 to 20 days of proper baiting will bring your rat problem under control. However, with heavy infestations, Warfarat Crumbles bait stations are constantly inspected and maintained as the situation permits. Remember, Warfarat Crumbles bait stations are instantly ready to control any rat station you will have. In the modern way to keep rats from entering. Because of its water destruction, disease and damage to your property.
