DIRECTIONS FOR USE

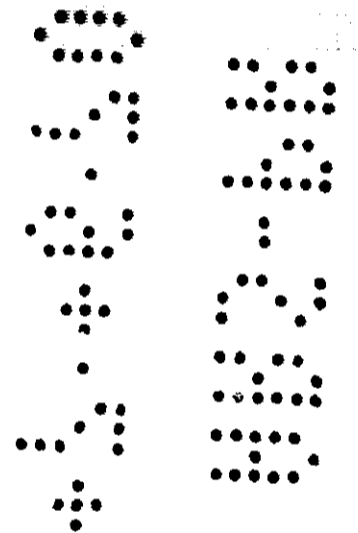

Before application brush animals to remove excess dirt and dust. Apply approximately 1/6 oz. to the facial area with fingers. Also apply similar amounts to other parts of the body where flies are particularly bothersome using a total of one ounce per animal. Avoid contact with eyes.

One application of REPEL-A-GEL will repel flies for 5 to 8 hours. May be applied twice daily at 10-hour intervals if necessary.

REPEL-A-GEL is a gel formulation containing a combination of effective fly repellents. One application will repel flies for 5 to 8 hours. The gel formulation is designed for easy wipe-on application to face, flanks and legs. The gel base imparts a high sheen to the coat.
