WETTABLE POWDER

For Control Of Insect Pests On Ornamentals, Lawn, and Certain Vegetables

ACCEPTED

DEC 21, 1967

UNDER THE FEDERAL INSECTICIDE
SELLING ACT AND THE FERTILIZER ACT,
FOUR EIGHT TWO POISON REGISTERED
ED UNDER NO. 236-16 SUBJECT

CAUTION

READ ENTIRE LABEL. USE IN STRICT ACCORDANCE
WITH LABEL DIRECTIONS AND CAUTIONS.

For protection of many lawns and ornamentals during periods of active pest activity, visit the lawn when necessary to protect ornamentals with a wettable powder advance to lawn for a distance of 10 to 20 feet, after application.

DIRECTIONS

VEGETABLE INSECT CONTROL

Susceptible vegetables include: beans, cabbages, and other cole crops, eggplant, tomatoes, and peppers. Use a dosage range as indicated, use low rate on young plants. Insecticide will be applied to plants to control insect activity. Keep plants well irrigated. Apply only to plants that are actively growing. Repeat at 7 to 10 day intervals as needed, with a short interval if needed.

BEANS - *Phaseolus vulgaris* - control beet beetles, and other cole crop pests. For Mexican bean beetle, 2 pounds per acre, broadcast, 2-3 times per week. For other cole crop pests, 1-2 pounds per acre, broadcast, 2-3 times per week. For other cole crop pests, 1-2 pounds per acre, broadcast, 2-3 times per week.

TOMATO, EGGPLANT AND PEPPER - control Colorado potato beetle, flea beetle, and other cole crop pests. For Colorado potato beetle, 2 pounds per acre, broadcast, 2-3 times per week. For flea beetle, 1-2 pounds per acre, broadcast, 2-3 times per week.

ORNAMENTAL INSECT CONTROL

Use a dosage range as indicated, use low rate on young plants. Insecticide will be applied to plants to control insect activity. Keep plants well irrigated. Apply only to plants that are actively growing. Repeat at 7 to 10 day intervals as needed, with a short interval if needed.

LAWN INSECT CONTROL

Use a dosage range as indicated, use low rate on young plants. Insecticide will be applied to plants to control insect activity. Keep plants well irrigated. Apply only to plants that are actively growing. Repeat at 7 to 10 day intervals as needed, with a short interval if needed.

For protection of many lawns and ornamentals during periods of active pest activity, visit the lawn when necessary to protect ornamentals with a wettable powder advance to lawn for a distance of 10 to 20 feet, after application.
