READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL CAUTIONS, WARNINGS AND DIRECTIONS.

KEEP PESTICIDE IN ORIGINAL CONTAINER

DIRECTIONS

Broadcast ORTHO Earwig Bait over areas known to be infested. As Earwigs are night feeders, bait at nightfall. Do not broadcast on valuable plants as foliage may be injured. Do not water over bait until at least two nights have elapsed. Because Earwigs wander about a great deal, frequent baiting may be necessary--particularly along fence lines to discourage reinfestation. It is important to start baiting at the first sign of Earwigs.

Best results are obtained when thorough baiting is made at regular intervals during feeding periods.
