ORTHO Fly Killer Dry Bait

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL CAUTIONS AND DIRECTIONS, AND WITH APPLICABLE FEDERAL AND STATE REGULATIONS

KEEP PESTICIDE IN ORIGINAL CONTAINER. DO NOT PUT CONCENTRATE OR DILUTE INTO FOOD OR DRINK CONTAINERS.

ORTHO Fly Killer Dry Bait kills both resistant and non-resistant strains of flies and cockroaches. They are attracted to it, feed on it, and die within minutes.

DIRECTIONS

FLY AND ROACH CONTROL IN AND AROUND DAIRY BARNs, MILK ROOMS, FOOD PROCESSING PLANTS, PATIOS, PICNIC AREAS, STABLES, STOCK PENS, KENNELS, ANIMAL HOSPITALS, OPEN AIR THEATERS, GARBAGE AREAS, OUTDOOR LATRINES AND OTHER PLACES WHERE THESE INSECTS ARE FOUND: ORTHO Fly Killer Dry Bait can be used dry "as is" or dissolved in water and sprinkled as described below. Good sanitation is essential to fly control. Remove wastes promptly. Apply daily until flies are controlled and then repeat as needed.

AS A DRY BAIT: Scatter lightly in strips on floors, window sills, and other clean horizontal areas. Use 4 ounces per 1,000 sq. ft., scattering lightly so that bait is barely visible. Apply directly to garbage and manure where flies breed and congregate. For faster kill, apply to a moistened surface.

AS A WATER SOLUTION FOR FLY CONTROL: Pour 1 lb. ORTHO Fly Killer Dry Bait into 1 gal. water, add 2 cups corn syrup or 1 lb. sugar and stir until dissolved. Sprinkle on floors, window sills, etc., of dairy barns and other farm buildings, and outside of these buildings where fly population is intense or bothersome.

WHERE FLOOR AREA IS LACKING: Where there is not enough clean floor area to assure control (for example, a dirt floor barn or a stockyard), treat sacks, boards, or strips of cardboard and place them inside or outside buildings where flies gather. First wet them, then apply product. Vertical surfaces indoors may be treated by dissolving in water and painting or spraying it on. Use only enough water to bring mixture to syrup-like consistency.

ROACH CONTROL IN STORES, RESTAURANTS, AND SIMILAR COMMERCIAL BUILDINGS: Place a small quantity of dry bait on pieces of paper, cardboard, or in shallow jar lids, and put in protected areas such as in closets, under sinks or refrigerators, out of reach of children and pets, and where dying insects cannot fall into food, utensils, or drinking water. Wet the bait slightly for increased killing efficiency.

NOTE: Do not use in edible products areas of food processing plants, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed. Do not

use in areas where food is prepared or served. Do not use in areas where food is stored. Do not use in areas where food is exposed. Do not use in areas where food is prepared or served. Do not use in areas where food is stored. Do not use in areas where food is exposed.

CAUTION May be harmful if swallowed. Wash thoroughly with soap and warm water. Wash contaminated clothing with soap and hot water before re use. Do not continue use if poisoning occurs. Get prompt medical aid. Atropine sulfate is antidotal. Dispose of empty container properly.

This product is toxic to fish and wildlife. Birds feeding on treated areas may be poisoned. Do not contaminate water by cleaning of equipment, or disposal of product only as specified on this label.

CONDITIONS OF SALE: 1. Chevron Chemical Company (Chevron) warrants that the chemical description on the label and is reasonably fit for use as directed hereon. Chevron makes, nor authorizes any agent or representative to make, any other warranty, MERCHANTABILITY, guarantee or representation, express or implied, concerning this product.

2. Critical and unforeseeable factors beyond Chevron's control prevent it from making any warranty, MERCHANTABILITY, guarantee or representation, express or implied, concerning this product.
